

**YOU'VE JUST
UNEARTHED BONE.**
**WITHIN 6 WEEKS WE CAN
TELL YOU ITS AGE.**

Our radiocarbon laboratory and counting facilities can give you the fastest service available anywhere. A complete age determination report of your bone specimen will be in your hands within 6 weeks. Often in less time.

And, the stress is on accuracy. Not only do we routinely date bone specimens directly by the collagen method, at the same cost as normal radiocarbon dating, but our C^{12}/C^{13} analysis, can compensate for natural isotopic fractionation.

Prices are based on the number of samples we date for you during any given 12 month period. Prices range from \$160 for a single sample to \$120 per sample for 50 or more samples. For C^{14} plus C^{12}/C^{13} analysis, the charge is \$185. Again, less for multiple analyses.

For complete details, call or write ISOTOPES, 50 Van Buren Ave., Westwood, N.J., 07675. (201) 664-7070.
