C O N T E N T S

No. 1 (FEBRUARY 1950)

Original Articles:	PAGE
406. The sale of veal calves and veal production in West Wales (1943-6). R. PHILLIPS	1
407. The number of sweat glands in the helix of the cow's ear and the milk yield. J. D. FINDLAY, A. MYFANWY GOODALL and S. H. YANG	22
408. Udder infections in the 'dry period'. I. F. K. NEAVE, F. H. DODD and ETTIE HENRIQUES	37
409. Apparatus for studies on disinfection of milking machine teat cups. G. E. K. LINEHAM	50
410. The oxidation of ascorbic acid in dairy products. J. E. ALLAN	54
411. <i>Pseudomonas putrefaciens</i> in New Zealand butter. G. I. THOMSON	66
412. Coliform bacteria in New Zealand butter. G. I. THOMSON	72
413. The growth requirements of lactobacilli in relation to cheese flavour development. G. J. E. HUNTER	79
Reviews of the Progress of Dairy Science:	
Section F. Milk-borne diseases. J. SMITH	91

No. 2 (JUNE 1950)

Original Articles:	
414. Experiments on milking technique. 7. The effect of subjecting dairy cows, for a complete lactation, to a rigid control of the duration of milking. F. H. DODD, A. S. FOOT, ETTY HENRIQUES and F. K. NEAVE	107
415. Factors affecting the rate of machine milking. ELEANOR S. BAXTER, PAMELA M. CLARKE, F. H. DODD and A. S. FOOT	117
416. The effect of bacterial infection on the milk yield of the individual quarters of the cow's udder. JOAN V. CROSSMAN, F. H. DODD, J. M. LEE and F. K. NEAVE	128
417. Keeping quality and raw-milk grading. I. Dye tests as measures of the keeping quality of milk. A. ROWLANDS, H. BARKWORTH, ZENA HOSKING and O. KEMPTHORNE	159
418. Device for preparing roll-tube cultures. G. M. MOIR and G. I. THOMSON	192
419. The phosphatase test of Aschaffenburg and Mullen. Use of permanent colour standards and comparison with the Kay-Graham test. J. TRAMER and J. WRIGHT	194
420. The colloidal phosphate of milk. I. Composition and titrimetric esti- mation. G. T. PYNE and J. J. RYAN	200
421. Haemolytic streptococci in cheese. C. L. HANNAY and L. G. NEWLAND	206
422. Cheese discoloration: oxidation of bixin in annatto-coloured cheeses promoted by sulphhydryl compounds. C. R. BARNICOAT	209

No. 3 (OCTOBER 1950)

Original Articles:	PAGE
423. Some observations on the behaviour of dairy cattle with particular reference to grazing. M. E. CASTLE, A. S. FOOT, and R. J. HALLEY	215
424. A study of lactation as affected by heredity and environment. L. C. SIKKA	231
425. Further investigations on the presence in raw milk of a bactericidal substance specific for certain strains of coliform organisms. C. S. MORRIS and M. A. EDWARDS	253
426. Some bacteriological aspects of the deterioration of pasteurized milk. T. R. ASHTON	261
427. The acid phosphatase of cows' milk. I. Some properties of the enzyme. J. E. C. MULLEN	288
428. The acid phosphatase of mammary tissue of the cow and the rat. J. E. C. MULLEN	306
429. Studies on Egyptian Domiati cheese. A. H. FAHMI and H. A. SHARARA	312
430. Studies of the nature of subjective judgements in cheese-grading. R. HARPER and M. BARON	329
431. Two samples of 7-year-old Cheddar cheese. EDITH R. HISCOX	336
Reviews of the Progress of Dairy Science:	
Section A. Physiology of dairy cattle. I. Reproduction and lactation.	
J. A. B. SMITH	338
