Medicine

Books and Journals from Cambridge University Press

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, and the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.

Practical Implementation of an Antibiotic Stewardship Program

Editors:

Tamar F.Barlam, *Boston Medical Center* Melinda M. Neuhauser, *Department of Veteran Affairs*

Pranita D. Tamma, The Johns Hopkins University School of Medicine

Kavita K. Trivedi, *Trivedi Consults*, *LLC.*

June 2018 / Hardback / 9781107166172 \$64.99 / £49.99 Practical Implementation of an Antibiotic Stewardship Program provides an essential resource for healthcare providers in acute care, long-term care, and ambulatory care settings looking either to begin or to strengthen existing antibiotic stewardship programs. Each chapter is written by both physician and pharmacist leaders in the stewardship field and incorporates both practical knowledge as well as evidence-based guidance. This book will also serve as a useful resource for medical students, pharmacy students, residents, and infectious diseases fellows looking to learn more about the field of antibiotic stewardship.

- Presents a practical guide for the implementation of antibiotic stewardship programs
- Offers real-life experience from experts in developing and sustaining antibiotic stewardship programs
- Incorporates both practical experience and evidence-based guidance to implement effective antibiotic stewardship programs in the acute care, long-term care, and ambulatory care settings

Practical Healthcare FOURTH EDITION Epidemiology

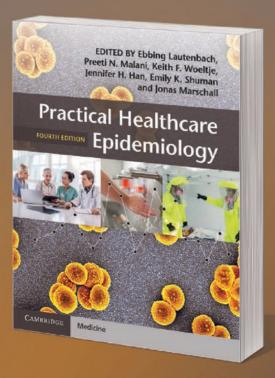

Editors:

Ebbing Lautenbach, *University of Pennsylvania School of Medicine*

Preeti N. Malani, *University of Michigan, Ann Arbor* Keith F. Woeltje, *Washington University School of Medicine, St Louis*

Jennifer H. Han, *University of Pennsylvania School of Medicine*

Emily K. Shuman, *University of Michigan, Ann Arbor* Jonas Marschall, *Washington University School of Medicine, St Louis*

May 2018 / Hardback / 9781107153165 \$185.00 / £145.00

Practical Healthcare Epidemiology takes a handson approach to infection prevention for physicians, healthcare epidemiologists, infection preventionists, microbiologists, nurses, and other healthcare professionals. Increased regulatory requirements and patient knowledge and involvement has elevated patient safety, healthcare-associated infections, antibiotic stewardship and quality-of-care to healthcare wide issues. This fully updated new edition brings together the expertise of leaders in healthcare epidemiology to provide best practice expert guidance on infection prevention for adult and pediatric patients in all types of healthcare facilities, from community hospitals and academic institutions, to long-term care and resource limited settings. Written in clear, straightforward terms to address prevention planning and immediate responses to specific situations, this is the go-to resource for any practitioners in medicine or public health involved in infection prevention, regardless of their current expertise in the field.

- In light of headline grabbing outbreaks like Ebola, the important subject of infection prevention and control in healthcare settings is more topical than ever
- The chapters of this book are clear and succinct, making excellent use of charts, graphs, and bulleted lists to guide the reader to essential information
- Provides a resource both for those new to the field and foundation of best practices across the healthcare continuum for specialists
