
INSTRUCTION TO CONTRIBUTORS

The *Journal of Helminthology* publishes papers on all aspects of animal parasitic helminths, particularly those of medical or veterinary importance, but only in exceptional circumstances will systematic or taxonomic studies be acceptable.

Manuscripts, which must be in English or French (with an English summary) should be accompanied by a letter signed by *all* the authors and should be addressed to:

The Editor, Journal of Helminthology,
London School of Hygiene and Tropical Medicine,
Winches Farm Field Station,
395 Hatfield Road,
St Albans, Herts AL4 0XQ,
England.

Two copies of a typescript, on size A4 paper with double spacing, should be submitted. Papers should be preceded by a short abstract and will normally have the following sections: brief Introduction; Materials and Methods; Results; Discussion; Acknowledgements; References. However, the form of the paper may vary, depending on its subject matter; recent past issues should be consulted for a suitable form. Research Notes should also be preceded by a brief abstract. Illustrations should be drawn in Indian ink, preferably not more than double the final size. Care should be taken that all illustrations fit into the format of the Journal. The maximum size an illustration will be printed is 12.0 × 20.0 cm. Where many separate drawings are made, some indication of how they may be grouped to make a corporate plate without undue wastage of space, should be indicated. Some indication of scale (preferably a scale bar) should normally be given on the figure. Photocopies of illustrations should be enclosed for refereeing purposes. Lettering and numbering, which must be of a high standard, should be added by the author, with due regard for subsequent reduction.

Photographs should be glossy prints of the same size as they are to appear in the Journal (maximum size 12.0 × 20.0 cm). Composite prints must be mounted and can have the separate photographs abutting; they will then have a separating line inserted by the printers. All figures and letters on photographs must be inserted by the author.

Information should not be repeated in the text and in tables or figures. The legends to tables and to figures should be sufficiently detailed for the information to be understood without reference to the text.

References should be given in alphabetical order with the full title of the journal. The following are examples:

DUKE, B. O. L. (1971) The ecology of onchocerciasis in man and animals. In: *Ecology and Physiology of parasites* (editor, A. M. Fallis) pp. 213–222. Adam Hilger Ltd.: London.

JAMES, C. & WEBBE, G. (1973) A comparison of Egyptian and East African strains of *Schistosoma haematobium*. *Journal of Helminthology*, **47**, 49–59.

25 offprints are provided free of charge; additional copies may be ordered at the proof stage.

Contents

	Pages
<i>Echinococcus multilocularis</i> : Identification of proteins inducing antibody formation in metacestode infection. K. LINGELBACH and E. HINZ	1-6
3,5-Dibromo-2'-chloro-4'-isothiocyanato salicylanilide in the control of <i>Hymenolepis nana</i> in rats—a pilot study. SUMAN GUPTA, J. C. KATIYAR, S. SHARMA and A. B. SEN	7-11
Humoral immunity and output of first-stage larvae of <i>Elaphostrongylus rangiferi</i> (Nematoda, Metastrongyloidea) by infected reindeer, <i>Rangifer tarandus tarandus</i> . G. GAUDERNACK, O. HALVORSEN, A. SKORPING and K. A. STOKKAN	13-18
The site selected by the larvae of <i>Heligmosomoides polygyrus</i> . M. V. K. SUKHDEO, R. T. O'GRADY and S. C. HSU	19-23
Insulin-like effects on fatty acid synthesis in liver of hamsters infected with plerocercoids of the tapeworm, <i>Spirometra mansonioides</i> . C. KIRK PHARES and R. M. CARROLL	25-30
<i>Hymenolepis muris-sylvaticae</i> in laboratory rodents. C. VAN HAEREN and P. H. DE RYCKE	31-37
<i>Cotugnia digonopora</i> : carbohydrate metabolism and effect of anthelmintics on immature worms. N. A. PAMPORI, GOVIND SINGH and V. M. L. SRIVASTAVA	39-47
Observations on the bionomics of the free-living stages of <i>Trichostrongylus vitrinus</i> . J. H. ROSE and A. J. SMALL	49-58
<i>Schistosoma mansoni</i> : an <i>in vivo</i> study of drug-induced autophagy in the gastrodermis. JOHANNA CLARKSON and D. A. ERASMUS	59-68
Separation of viable microfilariae free of blood cells on Percoll gradients. R. CHANDRASHEKAR, U. R. RAO, G. R. RAJASEKARIAH and D. SUBRAHMANYAM	69-70
Soluble antigens and antibodies in the sera of mice infected with <i>Trichinella spiralis</i> , detected by a modified double counterimmunoelectrophoresis technique. H. V. SMITH and M. W. KENNEDY	71-78
Announcements	12, 24, 38
Book Review	78
