

# JOURNAL OF K-THEORY

## Instructions for Contributors

### Submission of Manuscripts

Authors planning to submit papers are asked to prepare, if possible, their manuscript using LaTeX or AMS-LaTeX. Manuscripts should be submitted as a PDF attachment to an e-mail sent to any editor, or to the Managing Editor, Professor A. Bak (bak@math.uni-bielefeld.de). If your article is accepted, you will be asked to supply the LaTeX source code including the graphics, any author defined macros and all style files.

### Layout of Manuscripts

Manuscripts should have a short abstract, followed by an introduction which includes references to important related work found elsewhere. The remainder of the paper should be divided into sections, each having a title. Accepted papers should have key words and Mathematics Subject Classification (2000) codes placed immediately after the abstract.

Manuscripts may be prepared in English, French, or German. English is the preferred language.

### Proofs

The corresponding author receives one set of proofs for correction. If excessive alterations to the original manuscript are requested after the paper has been typeset, the authors will be charged for the cost of resetting.

### Online Posting Rights

Authors will receive a definitive PDF file of their contribution as published at Cambridge Journals Online. They may post it on their personal or departmental web page, provided that the posting includes a prominent statement of the full biographical details, a copyright notice in the name of the copyright holder, Independent Scholarly Online & Print Publishing (ISOPP), and a link to the online edition of the journal at Cambridge Journals Online.

# Journal of *K*-Theory

Volume 3 Issue 1

## Contents

---

- Cohomologically triangulated categories II 1  
*H.-J. Baues and F. Muro*
- Homotopy theory of well-generated algebraic triangulated categories 53  
*Gonçalo Tabuada*
- Necessary and sufficient analytical conditions for the existence of false gauge field copies 75  
*Adonai S. Sant'Anna*
- Motivic decomposition of anisotropic varieties of type F4 into generalized Rost motives 85  
*S. Nikolenko, N. Semenov and K. Zainoulline*
- Classification of all connected subgroup schemes of a reductive group containing a split maximal torus 103  
*Ekaterina Sopkina*
- Cohomology for bicomodules: Separable and Maschke functors 123  
*L. El Kaoutit and J. Vercruyse*
- On the vanishing of twisted nil groups 153  
*Daniel Juan-Pineda and Rafael Ramos*
- Grothendieck groups for categories of complexes 165  
*Hans-Bjørn Foxby and Esben Bistrup Halvorsen*

Cover design and colour scheme by A. Bak
