—CRIMINOLOGY FROM AN ANARCHIST PERSPECTIVE—

THE STRUGGLE TO BE HUMAN: CRIME, CRIMINOLOGY AND ANARCHISM

By

LARRY TIFFT
Central Michigan University

DENNIS SULLIVAN
College of St. Rose

The Struggle To Be Human is a foundational work which attempts to restore to human consciousness a more fundamental understanding of the conditions of social life, maintaining as it does that human survival and continuity are not insured by violence or power or institutions derived from the state or its certifying professions, but through human competencies and usefulness derived from cooperation and mutual aid.

The Struggle To Be Human emerges amidst the recurring failure of both academic and marxist sociologies to provide insight into ways in which we can live together harmoniously. It links the issues of social harm and punishment to scarcity and the basic human struggle to be free, and provides an incisive critique of the institutions of law, the state and certifying administrative systems. Also, it provides some historical insights into how both academic and marxian analyses, by their insistence upon the centrality of the State, continue to trade away the possibility of present human fulfillment and community for a managed, power-based existence.

Harvard University, Cambridge, Massachusetts

MEDITATION AND SOCIETY

Conflict Management in Lebanon

By CATHIE J. WITTY

Mediation and Society is a theoretical and empirical inquiry into the nature of mediation and its relation to people, communities, and social systems. This comparative legal analysis is based on two comparative case studies—one Lebanese and the other American. It develops and illustrates a general theory of mediation and also addresses concrete issues of social and legal planning. The cross-cultural exploration specifically offers rich clues for planning and implementing more effective methods of dispute settlement appropriate to American culture. Mediation is viewed as an integral and necessary component of conflict management systems. The radically different political and personal implications of mediation and adjudication are illustrated, thus providing one step in the cumulative process necessary in reassessing dispute resolution and conflict management on local and national levels.

SOCIAL ORDER AND THE LIMITS OF LAW

A Theoretical Essay
IREDELL JENKINS

Attempting to reach a better understanding of the nature of law and its proper place in the social order, Prof. Jenkins develops a systematic theory of the origins, the ends, and the functions of law. He then applies this theory to the problems that law encounters and the conditions that it must satisfy if it is to be an effective force in society.

"Jenkins is very much his own thinker, and he makes his arguments with a rare mixture of lucidity and elegance. I think that this is the book that Alexander Bickel would have liked to have written."
