

THE SECOND HUTTON SYMPOSIUM ON  
THE ORIGIN OF GRANITES AND RELATED ROCKS

TRANSACTIONS  
OF  
THE ROYAL SOCIETY  
OF  
EDINBURGH

EARTH SCIENCES

Volume 83 Parts 1 and 2

PUBLISHED BY THE ROYAL SOCIETY OF EDINBURGH

22 GEORGE STREET · EDINBURGH · EH2 2PQ

1992

## Editorial Board

E. N. K. CLARKSON  
University of Edinburgh  
(Chairman)

G. S. BOULTON  
University of Edinburgh

P. E. BROWN  
University of St Andrews

J. B. DAWSON  
University of Edinburgh

C. H. DONALDSON  
University of St Andrews  
(Executive Editor)

A. L. HARRIS  
University of Liverpool

J. MCMANUS  
University of St Andrews  
(Executive Editor)

A. L. PANCHEN  
University of Newcastle upon Tyne

N. B. PRICE  
University of Edinburgh

D. M. RAMSAY  
University of Glasgow

R. J. KNOPS  
(Curator)  
The Royal Society of Edinburgh

## Consulting Editors

SHOHEI BANNO  
Kyoto University

W. L. BROWN  
Centre de Recherches Pétrographiques et Géochimiques,  
Vandoeuvre-les-Nancy

B. W. CHAPPELL  
Australian National University, Canberra

J. M. COLEMAN  
Louisiana State University, Baton Rouge

J. F. DEWEY  
University of Oxford

D. G. GEE  
Lunds Universitet

R. W. HUTCHINSON  
Colorado School of Mines

E. JÄGER  
Universität Bern

J. KONTA  
Charles University, Prague

R. MACDONALD  
University of Lancaster

D. B. MCINTYRE  
Kinfauns, Perth

K. J. MÜLLER  
Rhein. Friedrich-Wilhelms-Universität Bonn

D. F. STRONG  
University of Victoria, B.C.

V. C. THAKUR  
Wadia Institute of Himalayan Geology

S. UYEDA  
University of Tokyo

O. VAN BREEMEN  
Geological Survey of Canada, Ottawa

R. WOODALL  
Western Mining Co., Adelaide

# Second Hutton Symposium The Origin of Granites and Related Rocks

Proceedings of a Symposium held at the  
Australian Academy of Science, Canberra  
23–28 September 1991

Edited by P. E. Brown and B. W. Chappell

## CONTENTS

|   |     |
|---|-----|
| BROWN, P. E.<br>Preface   | v   |
| CHAPPELL, B. W. and WHITE, A. J. R.<br>I- and S-type granites in the Lachlan Fold Belt  | 1   |
| BACON, C. R.<br>Partially melted granodiorite and related rocks ejected from Crater Lake caldera, Oregon  | 27  |
| MILLER, C. F., HANCHAR, J. M., WOODEN, J. L., BENNETT, V. C., HARRISON, T. M.,<br>WARK, D. A. and FOSTER, D. A.<br>Source region of a granite batholith: evidence from lower crustal xenoliths and inherited accessory minerals | 49  |
| MAHOOD, G. A. and CORNEJO, P. C.<br>Evidence for ascent of differentiated liquids in a silicic magma chamber found in a granitic pluton   | 63  |
| NORMAN, M. D., LEEMAN, W. P. and MERTZMAN, S. A.<br>Granites and rhyolites from the northwestern U.S.A.: temporal variation in magmatic processes and relations to tectonic setting   | 71  |
| SANDIFORD, M., FODEN, J., ZHOU, S. and TURNER, S.<br>Granite genesis and the mechanics of convergent orogenic belts with application to the southern Adelaide Fold Belt   | 83  |
| ELLIS, D. J. and OBATA, M.<br>Migmatite and melt segregation at Cooma, New South Wales  | 95  |
| ZEN, E-an<br>Using granite to image the thermal state of the source terrane   | 107 |
| CHAMPION, D. C. and CHAPPELL, B. W.<br>Petrogenesis of felsic I-type granites: an example from northern Queensland  | 115 |
| BARBERO, L. and VILLASECA, C.<br>The Layos Granite, Hercynian Complex of Toledo (Spain): an example of parautochthonous restite-rich granite in a granulitic area   | 127 |
| ZECK, H. P.<br>Restite-melt and mafic–felsic magma mixing and mingling in an S-type dacite, Cerro del Hoyazo, southeastern Spain  | 139 |
| BARBARIN, B. and DIDIER, J.<br>Genesis and evolution of mafic microgranular enclaves through various types of interaction between coexisting felsic and mafic magmas  | 145 |
| KILPATRICK, J. A. and ELLIS, D. J.<br>C-type magmas: igneous charnockites and their extrusive equivalents   | 155 |
| HAAPALA, I. and RÄMÖ, O. T.<br>Tectonic setting and origin of the Proterozoic rapakivi granites of southeastern Fennoscandia  | 165 |
| BROWN, P. E., DEMPSTER, T. J., HARRISON, T. N. and HUTTON, D. H. W.<br>The rapakivi granites of S Greenland—crustal melting in response to extensional tectonics and magmatic underplating                                      | 173 |
| ALLEN, C. M.<br>A nested diapir model for the reversely zoned Turtle Pluton, southeastern California  | 179 |
| STEPHENS, W. E.<br>Spatial, compositional and rheological constraints on the origin of zoning in the Criffell Pluton, Scotland  | 191 |
| WYBORN, L. A. I., WYBORN, D., WARREN, R. G. and DRUMMOND, B. J.<br>Proterozoic granite types in Australia: implications for lower crust composition, structure and evolution  | 201 |
| HILL, R. I., CHAPPELL, B. W. and CAMPBELL, I. H.<br>Late Archaean granites of the southeastern Yilgarn Block, Western Australia: age, geochemistry, and origin  | 211 |
| MEIGHAN, I. G., FALLICK, A. E. and McCORMICK, A. G.<br>Anorogenic granite magma genesis: new isotopic data for the southern sector of the British Tertiary Igneous Province   | 227 |
| WILLIAMSON, B. J., DOWNES, H. and THIRLWALL, M. F.<br>The relationship between crustal magmatic underplating and granite genesis: an example from the Velay granite complex, Massif Central, France                             | 235 |

|   |     |
|---|-----|
| RECIO, C., FALLICK, A. E. and UGIDOS, J. M.<br>A stable isotopic ( $\delta^{18}\text{O}$ , $\delta\text{D}$ ) study of the late-Hercynian granites and their host-rocks in the Central Iberian Massif (Spain)                                 | 247 |
| SHIMURA, T., KOMATSU, M. and IYAMA, J. T.<br>Genesis of the lower crustal garnet–orthopyroxene tonalites (S-type) of the Hidaka Metamorphic Belt, northern Japan  | 259 |
| SEWELL, R. J., DARBYSHIRE, D. P. F., LANGFORD, R. L. and STRANGE, P. J.<br>Geochemistry and Rb–Sr geochronology of Mesozoic granites from Hong Kong   | 269 |
| WEAVER, S. D., ADAMS, C. J., PANKHURST, R. J. and GIBSON, I. L.<br>Granites of Edward VII Peninsula, Marie Byrd Land: anorogenic magmatism related to Antarctic–New Zealand rifting   | 281 |
| RAPELA, C. W., PANKHURST, R. J. and HARRISON, S. M.<br>Triassic “Gondwana” granites of the Gastre district, North Patagonian Massif   | 291 |
| BLEVIN, P. L. and CHAPPELL, B. W.<br>The role of magma sources, oxidation states and fractionation in determining the granite metallogeny of eastern Australia  | 305 |
| CANDELA, P. A.<br>Controls on ore metal ratios in granite-related ore systems: an experimental and computational approach   | 317 |
| EWART, A., SCHON, R. W. and CHAPPELL, B. W.<br>The Cretaceous volcanic-plutonic province of the Central Queensland (Australia) coast—a rift related ‘calc-alkaline’ province  | 327 |
| ESPERANÇA, S. and MOYER, T. C.<br>Rhyolites as probes of the crust: examples from Tertiary volcanism in Arizona, southwestern U.S.A.  | 347 |
| LAW, R. D., MORGAN, S. S., CASEY, M., SYLVESTER, A. G. and NYMAN, M.<br>The Papoose Flat Pluton of eastern California: a reassessment of its emplacement history in the light of new microstructural and crystallographic fabric observations | 361 |
| HUTTON, D. H. W.<br>Granite sheeted complexes: evidence for the dyking ascent mechanism   | 377 |
| HUTTON, D. H. W. and INGRAM, G. M.<br>The Great Tonalite Sill of southeastern Alaska and British Columbia: emplacement into an active contractional high angle reverse shear zone   | 383 |
| BURNHAM, C. W.<br>Calculated melt and restite compositions of some Australian granites  | 387 |
| NEKVASIL, H.<br>Feldspar crystallisation in felsic magmas: a review   | 399 |
| HOLTZ, F., JOHANNES, W. and PICHAVANT, M.<br>Peraluminous granites: the effect of alumina on melt composition and coexisting minerals   | 409 |
| JOHANNES, W. and HOLTZ, F.<br>Melting of plagioclase in granite and related systems: composition of coexisting phases and kinetic observations  | 417 |
| BLENCOE, J. G.<br>A two-parameter Margules method for modelling the thermodynamic mixing properties of albite–water melts   | 423 |
| GREEN, T. H.<br>Experimental phase equilibrium studies of garnet-bearing I-type volcanics and high-level intrusives from Northland, New Zealand   | 429 |
