## The Correspondence of Charles Darwin, Volume 3: 1844-1846

Edited by FREDERICK BURKHARDT and SYDNEY SMITH

The latest volume in this much-praised project finds Darwin completing his work on the geology of the Beagle voyage, and established within the circle of London naturalists. From his growing and comfortable household at Down, his letters proclaim his conviction that species are mutable. In a series of astute, novel correspondences, especially with the young Joseph Dalton Hooker, the questions are framed and the evidence compiled that eventually result in his theories of species.

## Charles Darwin's Natural Selection

Being the Second Part of His Big Species Book Written from 1856 to 1858

Edited by R. C. STAUFFER

*Natural Selection* is the manuscript on which Darwin based his landmark volume *On the Origin of Species*. This edition, first published in 1975, presents for the first time the complete work, a formal and thorough presentation of Darwin's views on evolution.

'*Natural Selection* is a joy to read. It is full of insights and subtle observations that never found their way into the *Origin*.'

## Charles Darwin's Notebooks 1836-1844

Edited by P. H. BARRETT, P. J. GAUTREY, S. HERBERT, D. KOHN and S. SMITH

Darwin's notebooks provide an invaluable record of his scientific thinking and, most importantly, the development of his theory of natural selection. Prepared to the highest modern standards of textual editing, this volume contains vital work from the Beagle voyage and afterwards in England.

## Galileo: Heretic

Pietro Redondi

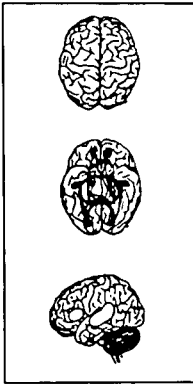

Translated by *Raymond Rosenthal*

Here is the much-awaited English translation of a book that has been the subject of widespread debate since its publication in Italy and its translation into French. Pietro Redondi boldly reinterprets Galileo's famous trial for heresy in 1633, arguing that the Jesuits plotted Galileo's downfall for reasons other than his beliefs about astronomy.

**"Redondi writes highly documented history, but he loves to tell stories; and, as much as the narrative of historical facts, the story of his own research acquires the suspense of a detective story."**

—*Italo Calvino, The New York Review of Books*

Cloth: \$29.95 ISBN 0-691-08451-3

## Medicine, Mind, and the Double Brain

A Study of Nineteenth-Century Thought  
*Anne Harrington*

Questions about the duality and asymmetrical functioning of the human brain gained a new prominence in the 1960s, but interest in brain duality and functional asymmetry also pervaded the nineteenth century. In *Medicine, Mind, and the Double Brain*, Anne Harrington gives a powerful sense of the range and richness of this little appreciated older tradition.

Cloth: \$39.50 ISBN 0-691-08465-3

## Avicenna in Renaissance Italy

The *Canon* and Medical Teaching  
in Italian Universities after 1500

*Nancy G. Siraisi*

The *Canon* of Avicenna, one of the principal texts of Arabic origin to be assimilated into the medical learning of medieval Europe, retained importance in Renaissance and early modern European medicine. Nancy Siraisi focuses on the *Canon* in sixteenth- and early seventeenth-century Italy, and especially on its role in the university teaching of philosophy of medicine and physiological theory.

Cloth: \$49.95 ISBN 0-691-05137-2

## Power and Penury

Government, Technology and Science in Philip II's Spain

DAVID GOODMAN

David Goodman's unique and deeply-researched book is a reconsideration of Philip II's relations with technology and the sciences, showing the crown's considerable involvement in shipbuilding, military engineering, mining, medicine and the occult. The book thus emphasizes the hitherto neglected role of Spain in the early development of European science.

## The Beginnings of the Nobel Institution

The Science Prizes, 1901-1915

ELISABETH CRAWFORD

The fascinating early history of the Science prizes shows the international scientific establishment and the developing Institute grappling with politics, the media, and the ambitions and personalities of the major figures involved.

'I warmly recommend it for serious study and browsing alike, it will provide many hours of pleasure.'

## The Extraterrestrial Life Debate 1750-1900

The Idea of a Plurality of Worlds from Kant to Lowell

MICHAEL J. CROWE

'There isn't an uninteresting page in it. It is a masterly review of an intriguing subject, erudite and entertaining, clear and all-encompassing reading for anyone interested in "one of the most wondrous and noble questions in nature" – does extraterrestrial life exist?'

## Innovation and the Rise of the Tunnelling Industry

GRAHAM WEST

Studying technical innovation in the historical development of the tunnelling industry, this book covers the period from 1825, when Marc Isambard Brunel invented the tunnelling shield, to the 1980s. The conditions that have allowed technical innovation to flourish in the tunnelling industry are identified, leading to a more general discussion of the nature of technical innovation.

## Gassendi the Atomist

Advocate of History in an Age of Science

LYNN S. JOY

This study of the life and work of the French physicist and philosopher, Pierre Gassendi, describes how he revived the ancient Greek philosophy of Epicurean atomism and points to the important role of humanist scholarship in the development of science in the seventeenth century.

## THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

**Membership** of the Society, which includes a subscription to *The British Journal for the History of Science*, is open to all persons approved by the Council of the Society and elected at an ordinary meeting (formalities required by the UK Companies Act). The annual subscription for the membership year 1987–1988 is £13.50 (US \$27.00 in the Americas, Canada and Japan) or for students, £6.75 (\$13.50). Applications for membership should be made on a form which is available from the Society's Executive Secretary at the address below.

**Meetings:** The Society mounts an ambitious programme of meetings. The pattern is flexible, the only fixture being the three day summer meeting, held at a different British University or Polytechnic each year. About four other meetings, lasting for between one and three days, are held during the year, sometimes devoted to a clearly-defined theme or an important anniversary, and often arranged in conjunction with other scholarly societies.

The *British Journal for the History of Science* is the official organ of the Society. All correspondence on the contents of the *Journal* should be addressed to the Editor, Dr David Knight, Department of Philosophy, University of Durham, 50 Old Elvet, Durham DH1 3HN, England.

**Books for review** should be sent to the Reviews Editor, Dr John Hendry, 58 Canfield Gardens, London NW6 3EB.

**Advertising:** Contact the Advertising Department, Blackwell Scientific Publications, Osney Mead, Oxford, OX2 0EL. Fax no. (0865) 721205.

**Other publications:** BSHS Monograph Series is designed to allow the publication of monographic studies in the history of science quickly and cheaply. All correspondence on the subject of monographs, and any new suggestions for titles, should be sent to the Series Editor, Dr J. G. Smith, Department of History, University of Loughborough, Loughborough, Leics LE11 3TU, England. Monographs are available to members at a special price, post-free from the Society's Executive Secretary. Non-members may obtain them through bookshops, or post-free from the Executive Secretary. Now available:

1. *Images of the Earth: Essays in the History of the Environmental Sciences*. Ed. by L. J. Jordanova and Roy Porter. 1979. £7.50/\$15.00 (£5.00/\$10.00 to members).
2. *The Letters of Georges Cuvier: A Summary Calendar*. Ed. by Dorinda Outram. 1980. £4.50/\$9.00 (£3.50/\$7.00 to members).
3. *Rationality and Ritual: The Windscale Inquiry and Nuclear Decisions in Britain*. By Brian Wynne. £7.00/\$14.00 (£5.00/\$10.00 to members).
4. *The Royal Society and Its Fellows 1660–1700: The Morphology of an Early Scientific Institution*. By Michael Hunter. £9.00/\$18.00 (£6.50/\$13.00 to members).
5. *Francis Bacon's Natural Philosophy: A New Source. A Transcription of Manuscript Hardwick 72A with Translation and Commentary*. By Graham Rees, assisted by Christopher Upton. £7.90/\$15.50 (£5.60/\$11.00 to members).

**List of theses:** Every December, the Society publishes a full list of current theses in history of science in British universities. This is available free to members, and at a small charge to non-members on request to the Executive Secretary. Standing orders are accepted from members or non-members who wish to receive the list regularly.

The Society's *Newsletter*, an informal publication edited by Dr Mari Williams, Business History Unit, Lionel Robbins Building, 10 Portugal Street, London WC2A 2HD, appears in January, May and September each year. It is free to members, £4.50 for institutions and non-members.

All the administrative business of the Society is handled by The Executive Secretary, Wing-Commander G. Bennett, 'Southide', 31 High Street, Stanford-in-the-Vale, Faringdon, Oxfordshire SN7 8LH.
