NEW FROM CAMBRIDGE

The Habsburg Monarchy 1618–1815

Charles Ingrao

The first comprehensive history of the Habsburg monarchy, this book challenges the conventional notion of the monarchy's backwardness. It traces the monarchy's emergence as a military and cultural power of influence, with a significant population and industrial base, as well as progressive judicial and educational systems.

Handbook of **ORDER NOW** European History 1400-1600

Late Middle Ages, Renaissance and Reformation

Edited by Thomas A. Brady
(University of California, Berkeley)
Heiko A. Oberman (University of Arizona)
James D. Tracy (University of Minnesota)

Forty-one leading scholars in this field of history present the state of knowledge about the grand themes, main controversies and fruitful directions for research of European history in this era.

This original volume brings together the best erudition in an array of topical chapters that present current knowledge and thinking in ways useful to the specialist and accessible to students and to the educated non-specialist. The 2-Volume Set will be completed in 1995.

SANTE ROSSETTO

DUE SECOLI DI STAMPA A BELLUNO E A FELTRE

(XVII-XVIII)

L'autore in questo studio, che segue quello analogo su «La stampa a Treviso. Annali di Giulio Trento (1760-1844)» uscito nel 1989 nella stessa collana, prende in considerazione la nascita e lo sviluppo dell'arte tipografica nel Sei e Settecento nelle due città venete.

Il primo torchio a Belluno arriva nel 1629 per dare alle stampe le opere del vescovo Luigi Lollino. Si tratta di una presenza temporanea perché il proto-tipografo abbandonerà la città nel 1641.

A Feltre la prima tipografia nasce nel 1725 nei locali del seminario e avrà il suo massimo splendore nel ventennio 1740-60. A Belluno si riprenderà a stampare nel

1748 con l'incisore Giuliano Giampiccoli che poco dopo lascerà la sua bottega a Simone Fissi che darà vita alla maggiore tipografia bellunese del Sette e Ottocento.

Il libro, che aggiunge un tassello alla ricca storia del libro veneto, propone anche gli annali tipografici dei due secoli fino al 1800.

INVENTARI DEI MANOSCRITTI DELLE BIBLIOTECHE D'ITALIA ~

VOLUME CVII

CAMERINO
BIBLIOTECA COMUNALE VALENTINIANA

INVENTARIO REDATTO DA
GIACOMO BOCCANERA E DANIELA BRANCIANI

I manoscritti presi in esame in questo inventario costituiscono un patrimonio culturale ricco ed eterogeneo per l'epoca di appartenenza (secc. XIV-XX) e per il contenuto che spazia dalla letteratura alla diaristica, dalla storia locale alla medicina, dagli epistolari all'astronomia.

I molti manoscritti riguardanti Camerino, la storia e le memorie della Città, le sue famiglie illustri, la Signoria dei Da Varano, sono fonte preziosa di notizie non solo per gli studiosi di storia locale. I fondi provenienti dalle Case Religiose, i Conventuali Francescani, i Carlotti, i Domenicani, i Filippini, permettono di ricostruire, insieme alla storia religiosa della città, la presenza nei secoli e le vicende degli stessi Ordini Religiosi in questa zona delle Marche.

Significativa la presenza di alcuni codici rinascimentali citati anche da P.O. Kristeller nel suo «*Iter Italicum*».

La descrizione rigorosa, particolareggiata e generosa di notizie e di approfondimenti, fa dell'inventario uno strumento indispensabile per la conoscenza di questa collezione che, come ogni altra raccolta manoscritta, costituisce una espressione unica ed irripetibile del cammino culturale dell'uomo.

MACHIAVELLIAN RHETORIC

From the Counter-
Reformation to Milton
Victoria Kahn

Historians of political thought have argued that the real Machiavelli is the republican thinker and theorist of civic virtù. *Machiavellian Rhetoric* suggests that Renaissance readers were right to see Machiavelli as a Machiavel, a figure of force and fraud, rhetorical cunning and deception. Taking the rhetorical Machiavel as a point of departure, Victoria Kahn argues that this figure is attuned to the rhetorical dimension of his political theory in a way that later thematic readings of Machiavelli are not.

"Victoria Kahn's book will be the definitive study of Machiavellism in the Renaissance for our generation of scholarship."

TORAH AND LAW IN *PARADISE LOST*

Jason P. Rosenblatt

It has been the fate of Milton, the most Hebraic of the great English poets, to have been interpreted in this century largely by those inhospitable to his Hebraism. To remedy this lack of balance, Jason Rosenblatt reveals Milton's epic representations of paradise and the fallen world to be the supreme coordinates of an interpretive struggle, in which Jewish beliefs that the Hebrew Bible was eternally authoritative Torah were set against the Christian view that it was a temporary law superseded by the New Testament.

"With brilliance and with learning, Rosenblatt sheds new light on Milton's ambivalent Hebraism. This is a book to be cherished . . . by anyone curious about the relationship between reading and writing, interpretation and originality."

THE ENGLISH GARDEN

Meditation and Memorial
David K. Coffin

More so than other Europeans, the English have turned to their gardens or wooded "wildernesses" for contemplative consolation. To explore the meditative aspect of English garden-making, David Coffin combines selected poetry, diary extracts, letters, and more formal writing from the sixteenth through the eighteenth centuries with charming illustrations and his own perceptive commentary. Addressing both admirers of the English formal garden and students of English cultural history, Coffin leads readers on a fascinating tour.

SCIENCE AND THE SECRETS OF NATURE

Books of Secrets in Medieval and Early Modern Culture
William Eamon

According to William Eamon, it is in the "how-to" books written by medieval alchemists, magicians, and artisans that modern science has its roots. In closely examining this rich but little-known source of literature, Eamon reveals that printing technology and popular culture had as great an impact on early modern science as did the traditional academic disciplines.

"... William Eamon creates a picture of the origins of modern science that is unique, innovative, and persuasive."—John M. Riddle, North Carolina State University

"Eamon convincingly argues that the medieval books of secrets were an integral part of popular science and evolved into the new scientific philosophy of the Renaissance."—*Library Journal*

THE BUSINESS OF ALCHEMY

Science and Culture in the Holy Roman Empire

Pamela H. Smith

Pamela Smith explores the relationships among alchemy, the court, and commerce in order to illuminate the cultural history of the Holy Roman Empire in the sixteenth and seventeenth centuries. In showing how an overriding concern with religious salvation was transformed into a concentration on material increase and economic policies, Smith depicts the rise of modern science and early capitalism. With emphasis on the practices of natural philosophy and extensive use of archival materials, she brings alive the moment of cultural transformation in which science and the modern state emerged.

GERMAN SCULPTURE OF THE LATER RENAISSANCE, C. 1520-1580

Art in an Age of Uncertainty

Jeffrey Chipps Smith

During the Reformation, statues and carvings of saints were condemned by increasing numbers of Protestants as fearsome idols. This meant potential ruin for hundreds of German sculptors whose economic livelihood depended on church commissions. Focusing on how sculptors adjusted to this cultural tumult, Jeffrey Chipps Smith offers the first comprehensive examination of the artistic response to the challenge of the Reformation in German lands.

"The wealth of material contained in this book is staggering. . . . the work will not be superseded for a generation or more."

HISTORY, PROPHECY, AND THE STARS

The Christian Astrology of Pierre d'Ailly, 1350-1420

Laura Ackerman Smoller

Although astrology was viewed with suspicion by the medieval church, it became a major area of inquiry for the renowned cardinal and scholar Pierre d'Ailly. Through an examination of his letters, sermons, and philosophical, astrological, and theological treatises, Laura Ackerman Smoller reveals astrology's appeal as a scientific means to interpret history and prophecy.

"Laura Smoller's book offers the best introduction in English to the historical astrology of the later Middle Ages and early Renaissance—a set of beliefs and practices that influenced writers of history and builders of buildings as well as orthodox clerics and heretical computers of the horoscope of Jesus."
