

[Continued from p. iv of wrapper]

Infant feeding: mothers' antenatal attitudes and subsequent practices. By HELEN MACCAIG and J. L. SMART	18A
Protein synthesis and breakdown in muscle and kidney of diabetic and insulin treated rats. By E. C. ALBERTSE, V. M. PAIN and P. J. GARLICK	19A
Intra-strain differences in the response to overfeeding in the rat. By NANCY J. ROTHWELL and M. J. STOCK	20A
Fat transplantation into nude mice as a model for studying species differences in fat cell metabolism. By MARGARET ASHWELL and C. J. MEADE	21A
Exercise and wheat bran: effect on whole-gut transit. By R. J. HARRISON, A. R. LEEDS, N. R. BOLSTER and P. A. JUDD	22A

Proceedings of the Nutrition Society

CONTENTS OF VOL. 39, No. 1, FEBRUARY 1980

SYMPOSIUM PROCEEDINGS

Three Hundred and Thirty-second Scientific Meeting
Wellcome Lecture Hall of The Royal Society, London
18 SEPTEMBER 1979
NUTRITION OF THE MOTHER AND CHILD
Chairman: J. K. LLOYD, *St George's Hospital, London*

	PAGE
Maternal nutrition and the outcome of pregnancy—a critical appraisal. By D. J. NAISMITH	1
Cross-cultural aspects of pregnancy and breast-feeding. By G. J. EBRAHIM	13
<i>Chairman: E. M. WIDDOWSON, University of Cambridge</i>	
Food and the foetus and neonate. By O. G. BROOKE	17
Size at birth and growth in the first year of life of babies who are overweight and underweight at birth. By D. P. DAVIES	25
Assessing dietary intake and its relation to growth in British children. By M. NELSON	35

Three Hundred and Thirty-fourth Scientific Meeting
One Hundred and Thirtieth Scottish Meeting
Freedom Inn, Aviemore
2 and 3 OCTOBER 1979
NITROGEN METABOLISM
Chairman: A. A. WOODHAM, *Commonwealth Bureau of Nutrition, Aberdeen*

Protein synthesis: are there real species differences? By P. J. REEDS and G. E. LOBLEY	43
Amino acids as energy sources. By D. B. LINDSAY	53
Digestion and absorption of dietary protein in man. By D. B. A. SILK	61
Comparative amino acid requirements. By R. H. SMITH	71
<i>Chairman: PROFESSOR J. F. D. GREENHALGH, School of Agriculture, University of Aberdeen</i>	
Host animal-rumen relationships. By A. R. EGAN	79
Nitrogen exchanges in the rumen. By D. I. DEMEYER and C. J. VAN NEVEL	89
Notes from a forum on the assessment of nitrogen requirements	97

ABSTRACTS OF COMMUNICATIONS

Three Hundred and Thirty-seventh Scientific Meeting
Queen Elizabeth College, London
6 DECEMBER 1979

The immunological effect of a high dietary intake of soya protein in man. By N. J. GOULDING, M. J. GIBNEY, P. J. GALLAGHER, D. B. JONES, JANE B. MORGAN and T. G. TAYLOR	2A
Dietary fibre and blood pressure. By ANGELA WRIGHT, P. G. BURSTYN and M. J. GIBNEY	3A
Morphological changes in the retinas of rats fed semi-synthetic diets. By W. M. F. LEAT and R. W. COX	4A
A follow-up study of nutrition and anthropometry in pre-school children. By JANE B. MORGAN and PAMELA M. MUMFORD	5A
The rate of passage of ciliate protozoa from the ovine rumen. By G. S. COLEMAN, R. M. C. DAWSON and D. W. GRIME	6A
Insulin secreting ability in relation to fatness in cattle. By N. G. GREGORY, T. G. TRUSCOTT and J. D. WOOD	7A
Renal lipogenesis and gluconeogenesis in streptozotocin-diabetic rats: effect of dietary sucrose. By S. S. KANG, S. NOIROT and J. YUDKIN	8A
Extraction of collagenase of possible leucocyte origin from ulcerating corneas of vitamin A deficient rats. By M. CHRISTINE LEONARD and L. K. MADDISON	9A
Zinc and dietary fibre: observations on a group of vegetarian adolescents. By JOYCE TREUHERZ	10A
Bioavailability to man of carbohydrate in foods. By D. J. A. JENKINS, T. M. S. WOLEVER, R. H. TAYLOR, HELEN M. BARKER, HASHMEIN FIELDEN, JANET M. BALDWIN, HILARY C. NEWMAN, A. C. BOWLING and D. V. GOFF	11A
Nitrogen balance and postoperative recovery. By S. SAGAR and R. SHIELDS	12A
The effect of anxiety on metabolic rate. By SANDRA E. BLAZA and J. S. GARROW	13A
Fasting heat production and maintenance requirement of early-weaned pigs. By K. J. McCracken	14A
Possible palliative role of cortisol treatment in protein-deficient pregnant rats. By M. DE LA HIGUERA, ISABEL GOÑI and G. VARELA	15A
Variation in probable feed intake of ewes given concentrates with varying trough-space allowance or self-help feedblocks. By P. T. KENDALL, R. G. HEMINGWAY and M. J. DUCKER	16A
Physiological effects of marginal riboflavin deficiency in young adults and geriatrics: a reduction in the in vivo survival time of erythrocytes. By HILARY J. POWERS and D. K. THURNHAM	17A
