

BRAIN RESEARCH REVIEWS

A section of **Brain Research** devoted to the publication
of review articles

Editor-in-Chief: **D.P. PURPURA**

*Brain Research, Office of the Dean, Albert Einstein College of Medicine,
1300 Morris Park Avenue, Bronx, NY 10461, U.S.A.*

Brain Research Reviews has, since its launch in 1979, been the dominant medium for the prompt publication of leading review articles in neuroscience. Timely reviews of rapid developments and numerous discoveries bring neuroscientists closer to an adequate understanding of brain mechanisms in health and disease, and serve to stimulate and direct further research efforts.

Brain Research Reviews, a special section of *Brain Research*, provides a reflection of present practice and progress and probes new dimensions of brain research, and as such has become essential reading for neuroscientists and those in related disciplines who are interested in remaining informed of significant advances in this exacting and exciting field.

All sections are available separately.
A full list of the Editorial Board and Notes to
Authors can be found in each issue.

Aims and Scope:

Brain Research Reviews provides a medium for prompt publication of review articles and, occasionally, long research papers with extensive review components, which give analytical surveys that define heuristic hypotheses and provide new insights into brain mechanisms.

Subscription Details:

1990 - Volume 15

(1 volume in 3 issues)

Price: US\$ 132.00/Dfl. 288.00

(plus US\$ 12.75/Dfl. 28.00 postage and handling)

ISSN 0165-0173

Subscribers to *Brain Research* automatically receive this section)

Abstracted/Indexed in:

Biological Abstracts (BIOSIS); Chemical Abstracts; Index Medicus; Excerpta Medica (EMBASE); Current Contents (Life Sciences); Psychological Abstracts (PsycINFO); PASCAL/CNRS Databases
