PUBLISHED BY CAMBRIDGE UNIVERSITY PRESS FOR
AND ON BEHALF OF THE ASSOCIATION OF SYMBOLIC LOGIC.

The BULLETIN, the JOURNAL and the REVIEW OF SYMBOLIC LOGIC are the official organs of the Association for Symbolic Logic, an international organization for furthering research in logic and the exchange of ideas among mathematicians, computer scientists, linguists, and others interested in this field. The BULLETIN encourages submissions of *Articles* and *Communications* in all areas of logic, including mathematical or philosophical logic, logic in computer science or linguistics, the history or philosophy of logic, and applications of logic to other fields. The BULLETIN also publishes reviews of publications in logic.

and Matthias Wille Matthias.wille@iel.uni-koeln.de.

Please follow the submission procedure described at

<http://www.aslonline.org/journals-bulletin-guide.html>

It is recommended that papers be prepared in \LaTeX using the ASL's class file, especially for manuscripts having extensive symbolic or mathematical notation. This style file is available from the ASL's website at <http://www.aslonline.org>; links from that site provide further information about the BULLETIN and about submitting papers for publication.

No print offprints will be supplied but authors will receive a link to a freely accessible electronic pdf of their published article. Print offprints may be purchased if required.

Articles present topics of broad interest in a way that is accessible to a large audience. They can be purely expository, survey, or historical articles or they may contain, in addition, new ideas or results or new approaches to old ones.

Communications should be announcements of important new results and ideas in any aspect of logic; they may be short papers in their final form or preliminary announcements (extended abstracts, position papers) of longer, full papers that will be published elsewhere. In any case, they should include, in addition to a description of the new results or ideas, enough history, background, and explanation to make the significance of the work apparent to a wide audience. *Communications* will be quickly refereed and published within six months of the submission of final version.

Books for review in the BULLETIN should be sent to ASL, BOX 742, Vassar College, 124 Raymond Avenue, Poughkeepsie, NY 12604, USA.

TABLE OF CONTENTS

ARTICLES

Approximating Beppo Levi's <i>Principio Di Approssimazione</i> , by RICCARDO BRUNI and PETER SCHUSTER	141
Nonstandard models in recursion theory and reverse mathematics, by C. T. CHONG, WEI LI, and YUE YANG	170

REVIEWS

Two papers by Ulrich Felgner on the history of mathematics, Reviewed by STEFFEN LEMPP	201
