

## NEW NUTRITION BOOKS – FROM BUTTERWORTHS

### Fats in Animal Nutrition

Edited by **Dr Julian Wiseman**, BSc(Hons)Agric., PhD, University of Nottingham School of Agriculture

***This book:***

- ☆ Provides a comprehensive assessment of the role of fats in animal nutrition
- ☆ Covers topics from basic biochemistry, through utilisation in diets to practical processing aspects
- ☆ Is written by leading contributors from the UK and overseas
- ☆ Is the proceedings of one of the highly successful Nottingham Easter Schools
- ☆ Is essential reading for workers in the animal feed industry and those involved in animal production and nutrition

*Fats in Animal Nutrition* is the edited proceedings of the 37th Nottingham Easter School, which undertook a comprehensive assessment of the nutritional role of fats in livestock diets, covering the biochemistry and physiology of the digestion and absorption of fats, the role of essential fatty acids, the energy-yielding role of fats and their utilisation in diets, an assessment of carcass quality and practical aspects of fat incorporation in diets.

May 1984    440 pages    250 illustrations    234 × 156 mm    0 408 10864 9    Hardcover    £45.00

### Recent Advances in Animal Nutrition – 1984

Edited by **W Haresign**, PhD and **D J A Cole**, PhD

University of Nottingham School of Agriculture

***This book:***

- ☆ Is the most recent volume in a widely respected and authoritative series
- ☆ Contains sections on nutrition of poultry, pigs and ruminants; featuring herds and dairy cows
- ☆ Is up-to-date – presents the edited proceedings of the 18th Nutrition Conference for Feed Manufacturers
- ☆ Is essential reading for commercial feed producers, advisory staffs, research workers and students

The opening chapters on poultry nutrition discuss the effects of diet and genotype on carcass quality and aspects of meat quality.

Topics on pig nutrition include the levels of performance and allergic responses to protein of early weaned pigs, comparison of the ARC and NRC recommended requirements and aspects of the digestive process in growing pigs. The section on ruminant nutrition covers the dietary allowances of minerals, trace elements and vitamins, manipulation of rumen fermentation and methods for nutritive evaluation of forages. The chapter on protein and energy requirements of horses is followed by a section on dairy cow nutrition which includes the effects of high protein and the manipulation of milk composition.

May 1984    288 pages approx    234 × 165 mm    0 407 01160 9    Hardcover    Illustrated    £30.00

Order from your bookseller or in case of difficulty from

**Butterworths**, Borough Green, Sevenoaks, Kent TN15 8PH

*Illustrations.* The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board, stout tracing paper or plastic film. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be avoided as far as possible but if unavoidable it should be included on a fly-leaf. Marginal lettering should be inserted lightly in pencil on the original diagram or on a fly-leaf.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors.
- (c) Colour plates are unlikely to be accepted unless authors bear the cost.

*Tables* should be as simple and as few as possible. Each table should be typed on a separate sheet.

*Abstract.* Every article should have a short abstract (not more than **250** words) complete in itself and understandable without reference to the paper. *The abstract will be printed at the beginning of the paper.*

*References.* Only papers closely related to the author's work should be referred to; exhaustive lists should be avoided. The arrangement of references should be as in recent papers in *Animal Production*; details are given in the notes for guidance.

*Proofs* are supplied once and must be returned corrected to the Editors *within 3 days*. Only essential corrections should be made.

*Reprints.* Twenty-five reprints of each paper will be supplied free to authors on request. Further copies may be purchased if the order is sent at the proof-stage.

*Animal Production* is published six times a year in two volumes. Annual subscription is £61·00 (or \$130·00 in the USA and Canada) and the price for a single part is £11·00 (or \$24·00) net.

*Proceedings of the British Society of Animal Production (New Series)* ceased publication in 1975 and the material is now published as a separate section in the June issue of *Animal Production*.

Correspondence regarding subscriptions and sales (current and back numbers of the Journal and the Proceedings), should be addressed to: Scottish Academic Press Ltd, 33 Montgomery Street, Edinburgh, Scotland EH7 5JX.

Other enquiries, including those concerning copyright, should be addressed to: Durrant Periodicals, Winton Lea, Pencaitland, East Lothian, Scotland EH34 5AY.
