Becoming MIT

MOMENTS OF DECISION

edited by David Kaiser

"Becoming MIT casts new light on how, through technology, industry, and fundamental science, this institution became the powerhouse it is today. But the book does far more—it unflinchingly looks at MIT's direct confrontation with issues of science and war, science and public policy, and gender inequity in the halls of the Institute itself. A remarkable study of an astonishing university."

— Peter Galison, Harvard University

THE INCEPTION OF MODERN PROFESSIONAL EDUCATION

C. C. Langdell, 1826-1906

HELLO PROFESSOR

A Black Principal and Professional Leadership in the Segregated South

Vanessa Siddle Walker with Ulysses Byas

Horace Mann's Troubling Legacy The Education of Democratic Citizens

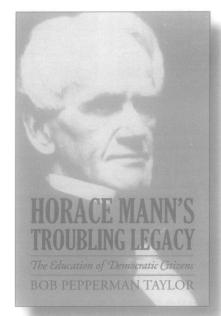

Bob Pepperman Taylor

"Taylor has written an excellent, provocative analysis of Horace Mann's ideas about civic education. Ironically, Mann's particular approach to promoting democratic education actually may have threatened the very intellectual and moral development that he thought was essential for fostering American democracy. This thoughtful, highly original book will be of great interest to scholars and anyone interested in civic education today."—Maris Vinovskis, author of From a Nation at Risk to No Child Left Behind

"This is a first rate book. Perhaps its greatest contribution is the compelling argument that Mann's approach to school for civic education discounted and marginalized the role of schools in training the intellect, and that this anti-intellectual component has persisted in the current model of schooling in the U.S."—David F. Labaree, author of Someone Has to Fail: The Zero-Sum Game of American Schooling
