"It is not too much to say that it is the best and most favourably known to  
the medical and legal professions, by both of whom it is quoted as the highest  
authority. It has acquired this enviable standing from the high reputation of its  
authors, from the correctness of the views and opinions expressed, and from  
its fulness. More than any work by English authors it deals with the subject of  
insanity in all its relations."—*Amer. Journ. of Insanity*.
