

NAME INDEX

All names by any reason cited in the various papers are listed in this index, followed by their respective page(s). Whenever they correspond to a bibliographic reference, they may of course be also found, on the basis of the indication given in the text, in the unified alphabetic list of references (pp. 245-252). In the case of papers with three or more authors, however, the text only gives the name of the first author followed by « et al. », whereas in the list of references all names are given. As a result, second and further authors in such papers are not listed in the present index.
