Tokyo, Japan

Nagoya Mathematical Journal is the official journal of the Graduate School of Mathematics, Nagoya University, designed solely for the publication of research papers. However, invited papers and other original papers in mathematics from all over the world are also regularly published in Nagoya Mathematical Journal. Currently, 4 volumes are published each year.

All manuscripts should be typewritten in English, French, or German. Papers should be prepared using $\text{T}_{\text{E}}\text{X}$ if possible, but only the printed hard copy should be submitted (2 copies). Authors submitting old-fashioned typescript are requested to clearly distinguish special symbols and letters such as bold-face, script, German and Greek letters. The editors may request the original $\text{T}_{\text{E}}\text{X}$ files of papers accepted for publication. The journal's $\text{L}_{\text{A}}\text{T}_{\text{E}}\text{X}$ style file and its manual can be obtained from the following URL.

<http://www.math.nagoya-u.ac.jp/nmj/index.html>

Papers should include

- (a) a short abstract of the contents,
- (b) classification numbers at the foot of page 1 according to the 2000 Mathematics Subject Classification, to be found in

<http://www.ams.org/>,

- (c) the author's coordinates, including e-mail address and Fax numbers,
- (d) for papers with long titles, the author's choice of running head (not longer than 50 characters).

As soon as we receive a manuscript, a receipt will be sent to the author. When a manuscript has been sent to a referee, the author will receive another notice. These receipts and notices, however, do not mean anything regarding the acceptability of the paper for publication. If the editorial committee has decided to accept a paper, the author will receive a notice containing the number of the volume in which the paper will appear.

Authors submitting a joint paper must provide instructions as to which author is responsible for proof-reading (only one set of proofs will be provided). Each author, as well as each co-author will have 50 reprints.

The manuscript and general correspondence should be addressed to: Managing editor, Nagoya Mathematical Journal, Graduate School of Mathematics, Nagoya University, Chikusa-ku, Nagoya, 464-8602, Japan.

CONTENTS

Kubota, T. and Yoshida, M.: A note on the congruent distribution of the number of prime factors of natural numbers	1
Brüdern, J. and Wooley, T.D.: On Waring's problem: Three cubes and a sixth power	13
Hu, G.: $L^2(\mathbb{R}^n)$ boundedness for the commutators of convolution operators	55
Lescot, P.: Kernel systems on finite groups	71
Albertini, C. and Brodmann, M.: A bound on certain local cohomology modules and application to ample divisors	87
Kang, S.-J., Kwon, J.-H. and Oh, Y.-T.: Peterson-type dimension formulas for graded Lie superalgebras	107
Todor, R., Chiose, I. and Marinescu, G.: Morse inequalities for covering manifolds	145
Kučera, R.: Formulae for the relative class number of an imaginary abelian field in the form of a determinant	167
Chang, S.-C.: Global existence and convergence of solutions of the Calabi flow on Einstein 4-manifolds	193
Diederich, K. and Mazzilli, E.: Zero varieties for the Nevanlinna class on all convex domains of finite type	215
Ohsawa, T.: Erratum to "On the extension of L^2 holomorphic functions V — Effects of generalization"	229
