CONTENTS

NO.		PAGE
1*	The Structures at the Epithelio-Connective Tissue Junction: A Comparison of Light and Electron Microscopic Observations. By S. C. Goel and A. Jurand, Institute of Animal Genetics, West Mains Road, Edinburgh. <i>Communicated by</i> Dr R. A. Beatty	1
2*	Polymegaly of Spermatozoan Length and its Genetic Control in <i>Drosophila</i> Species. By R. A. Beatty and N. S. Sidhu, Department of Genetics, Institute of Animal Genetics, Edinburgh	14
3*	Further Studies on the Cytology of Sawflies. By Ann R. Sanderson, Department of Biological Sciences, University of Dundee. <i>Communicated by</i> Professor John Walton	29
4*	Comparative Aspects of the Biology of Pike, <i>Esox lucius</i> L., in Two Scottish Lochs. By Muhammed Shafi, Department of Zoology, University of Glasgow, and Peter S. Maitland, Nature Conservancy, Edinburgh. <i>Communicated by</i> Dr H. D. Slack	41
5*	Factors Influencing the Determination of the Rheobase of Human Muscle. By W. G. S. Stephens, Department of Physiology, University of St Andrews. <i>Communicated by</i> Professor A. E. Ritchie	61
6*	On the Measurement of Accommodation. By W. G. S. Stephens, Department of Physiology, University of St Andrews. <i>Communicated by</i> Professor A. E. Ritchie	72
7*	A New Technique for the Assessment of Muscle Denervation using Isosceles Triangular Pulse Stimulation. By W. G. S. Stephens, Department of Physiology, University of St Andrews. <i>Communicated by</i> Professor A. E. Ritchie	86
8*	Estuarine Development and Sediment Distribution, with particular reference to the Tay. By J. McManus, University of Dundee	97
9*	Water Movements in the Tay Estuary. By J. West, University of Dundee	115
10*	Water Movements in the Firth of Forth. By R. E. Craig, D.A.F.S. Marine Laboratory, Aberdeen	131
11	The Quality of the Forth Estuary (1). By W. F. Collett, Forth River Purification Board	137
12	The Quality of the Forth Estuary (2). By R. W. Covill, Lothians River Purification Board	143
13*	The Fisheries of the Forth-Tay Estuaries. By H. J. Thomas and A. Saville, D.A.F.S. Marine Laboratory, Aberdeen	171
14	Occurrence of Specific Pollutants in Fish in the Forth and Tay Estuaries. By A. V. Holden, Freshwater Fisheries Laboratory, Pitlochry, and G. Topping, D.A.F.S. Marine Laboratory, Aberdeen	189
15*	Macroalgae and their Environment. By C. Johnston, Heriot-Watt University, Edinburgh	193
16*	Algal Metabolism and Water Pollution in the Tay Region. By W. D. P. Stewart, University of Dundee	209
Supplement		s 1-s 94

* The thanks of the Society are due to the Carnegie Trust for the Universities of Scotland for grants towards the costs of these papers.

INSTRUCTIONS TO AUTHORS (*continued*)

The overall space available for figures and plates is 250 × 175 mm in *Transactions* and 200 × 125 mm in *Proceedings*.

Photographs should be unmounted glossy black and white prints, marked on the back with the name of the author, number of the figure, and an indication of the top. Prints should not be trimmed or cut out. Authors should suggest the arrangement of the figures on each plate, either by a diagram or a paste-up of rough prints, with indication of any lettering to be inserted.

Lettering must be in black ink in neat and legible style, or lightly written in pencil.

Indicating Lines and Arrows required on wash drawings or photographs should have the point marked by a pin-hole, and must be drawn on the back or on a covering tissue and not on the photograph or drawing. On line drawings such lines should be drawn thin but firmly.

Graphs should be drawn on white Bristol board or on squared paper ruled in faint blue lines: no other colour ruling is suitable. Since blue lines do not appear in reproductions, any cross-lines required must be drawn. If a tracing of a graph constructed on an unsuitable grid is submitted, white tracing paper should be used.

Numerical values. In papers concerned with the biological sciences ALL numerical values must be accompanied by their decimal equivalents.

Tables. Tabular matter must be kept to a minimum. No paper should present both tables and corresponding graphs, except where good reason can be given.

Duplicates. When the author can conveniently do so, it is desirable that duplicates of illustrations should be supplied for the use of the referees.

Proofs of papers will be sent to authors or communicators to the addresses indicated in correspondence or on MSS. The cost of authors' **corrections in excess of 5 per cent.** of the printer's charges for the setting of a particular paper **will be charged to the authors.** Proofs should, if possible, be returned within one week to *The Secretary, The Royal Society of Edinburgh, 22 George Street, Edinburgh EH2 2PQ*, and *not to the printer.* To prevent delay, authors who are abroad, should, if possible, appoint someone in this country to correct proofs.

Offprints. As soon as a *Transactions* paper, or the sheet in which the last part of a *Proceedings* paper appears, is ready for press, copies of offprints, in covers bearing the title of the paper and the name of the author, are printed and placed on sale. The date of such separate publication is printed on each paper. Authors of papers will receive twenty-five offprints free, if they so desire. Additional offprints may be obtained at a fixed scale of prices given on a form attached to the first proof. To prevent disappointment, especially if a paper contains plates, authors should, as soon as possible, notify the Secretary of the number of additional copies required.

Indexes. To facilitate the compilation of indexes, and to secure due attention being given to the important points of a paper in Catalogues of Scientific Literature, authors are requested to supply to the Secretary, with the final proofs of papers, a brief index (on the model given below) of the points in a paper which are considered new or important. Indexes will be edited by the Secretary for publication in each volume of the *Transactions* and *Proceedings*.

MODEL INDEX

Houstoun, R. A.—A measurement of the velocity of light *Proc. Roy. Soc. Edinb.*, A, 63, 1949–50, 95–104.
Light, A measurement of the velocity of.

Authors are advised, before submitting papers, to consult *General Notes on the Preparation of Scientific Papers* (2nd Edn., 1965) (Royal Society of London), especially the chapters dealing with symbols, signs, and abbreviations recommended for British Scientific Publications. A copy may be consulted in the Library of The Royal Society of Edinburgh. Personal copies of the *General Notes* may be obtained, price 30p per copy, postage included, from the Executive Secretary, Royal Society of London, 6 Carlton House Terrace, London SW1Y 5AG.
