RETHINKING VIENNA 1900

Edited by **Steven Beller**, Washington, D.C.

Fin-de-siècle Vienna remains a central event in the birth of the century's modern culture. Our understanding of what happened in those key decades in Central Europe at the turn of the century has been shaped in the last years by a historiography presided over by Carl Schorske's *Fin-de-siècle Vienna* and the model of the relationship between politics and culture that emerged from his work and that of his followers. Recent scholarship, however, has begun to question the main paradigm of this school, i.e., the "failure of liberalism."

This volume reflects not only a whole range of the critiques but also offers alternative ways of understanding the subject, most notably though the concept of "critical modernism" and the integration of previously neglected aspects, such as the role of marginality, of the market, and of the larger Central and European context. As a result, this volume offers novel ideas on a subject that is of unending fascination and never fails to captivate the Western imagination.

"This enthralling collection of ten distinguished essays provides not only the best introduction to the subject, but is a major contribution in its own right."

—**Tim Blanning**, Cambridge University

"Beller's excellent introduction ... clearly lays out the scope of the original argument, provides a sound review of existing scholarship and a clear summary.... [A] well-organized and focused [collection]."

—**Laura Gellott**, University of Wisconsin-Parkside

THE GREAT TRADITION AND ITS LEGACY

The Evolution of Dramatic and Musical Theater in Austria and Central Europe

Edited by **Michael Cherlin**, Professor of Music Theory, University of Minnesota; **Halina Filipowicz**, Professor of Slavic Literatures, University of Wisconsin, Madison; and **Richard L. Rudolph**, Professor Emeritus, University of Minnesota

Both dramatic and musical theater are part of the tradition that has made Austria—especially Vienna—and the old Habsburg lands synonymous with high culture in Central Europe. Many works, often controversial originally but now considered as classics, are still performed regularly in Vienna, Prague, Budapest, or Cracow. This volume offers an excellent overview of the theatrical history of the region and makes an innovative, cross-disciplinary attempt to analyze the inner workings and dynamics of theater through a discussion of the interplay between society, the audience, and performing artists.

CREATING THE OTHER

Ethnic Conflict and Nationalism in the Habsburg Central Europe

Edited by **Nancy M. Wingfield**, Department of History, Northern Illinois University

The historic myths of a people/nation usually play an important role in the creation and consolidation of the basic concepts from which the self-image of that nation derives. These concepts include not only images of the nation itself, but also images of other peoples. Although the construction of ethnic stereotypes during the “long” nineteenth century initially had other functions than simply the homogenization of the particular culture and the exclusion of “others” from the public sphere, the evaluation of peoples according to criteria that included “level of civilization”

yielded “rankings” of ethnic groups within the Habsburg monarchy. That provided the basis for later, more divisive ethnic characterizations of exclusive nationalism, as addressed in this volume that examines the roots and results of ethnic, nationalist, and racial conflict in the region from a variety of historical and theoretical perspectives.

MEDICINE AND MEDICAL ETHICS IN NAZI GERMANY

Origins, Practices, Legacies

Edited by **Francis R. Nicosia**, Saint Michael's College, Vermont, and **Jonathan Huener**, University of Vermont

The participation of German physicians in medical experiments on innocent people and mass murder is one of the most disturbing aspects of the Nazi era and the Holocaust. Six distinguished historians working in this field address the critical issues raised by these murderous experiments, such as the place of the Holocaust in the larger context of eugenic and racial research, the motivation and roles of the German medical establishment, and the impact and legacy of the eugenics movements and Nazi medical practice on physicians and medicine since World War II.

Based on the authors' original scholarship, these essays offer an excellent and very accessible introduction to an important and controversial subject. They are also particularly relevant in light of current controversies over the nature and application of research in human genetics and biotechnology.
