#### INFORMATION FOR CONTRIBUTORS

Articles should not exceed 10,000 words in length. Editions of previously unpublished texts and documents as well as short papers will also be considered for publication. No paper will be considered if it is not satisfactorily documented. The Editors reserve the right to make stylistic or bibliographical emendations.

The following notes are not intended to be comprehensive: would-be contributors are strongly recommended to use the style sheet, available from the Assistant Editor, for guidance. Manuscripts must be submitted in duplicate, with double spacing and wide margins: the author should retain a copy. *References* must be typed with double spacing and arranged by number in order of their citation in the text: strict adherence to the standard form is required. Two *illustrations* are allowed free of charge, at the Editors' discretion; any in addition will be charged to the author. Each caption must include particulars of the source of the illustration and should be typed on a separate sheet.

Each contributor will receive a *proof*, which should be corrected and returned to the Assistant Editor as quickly as possible. Any changes other than the correction of typographical errors will be charged to the author.

Authors will receive 25 *offprints*, and a copy of the journal, free of charge. Particulars of the cost of additional offprints will be sent before publication, and orders must be made by return.

## CALL FOR PAPERS

This international multidisciplinary conference will examine all aspect of the past, present, and future of clinical trials. The event will consist of plenary sessions, parallel sessions, discussions, and presentations selected from submissions. We are now inviting abstracts for presentations and poster sessions.

### Aims of the Conference

- To exchange knowledge and perspectives about the past, present and future of therapeutic evaluation.
- To create a dialogue among statisticians, clinical trialists, clinicians, historians, patients' representatives and social scientists about the means and ends of clinical trials.
- To commemorate the 50th anniversary of the publication of the MRC Streptomycin trial.

### Themes

- The historical development of health care evaluation
- International differences in approaches to health care evaluation
- The politics of randomised trials and other forms of evaluation
- Ethical aspects of randomised controlled trials

- Consumer participation in randomised controlled trials
- Industry, government regulation and clinical trials
- The quality of randomised controlled trials
- Statistical aspects of randomised controlled trials
- The everyday business of running randomised controlled trials
- Trials of historical and/or methodological significance
- How trials affect clinical practice
- Trials and health policy: priorities and clinical trials
- The future of health care evaluation

The conference will be of interest to:

- Clinical Trialists, Historians, Statisticians, Social Scientists, Clinicians, Patients' representatives, Ethicists, and other Health Care Professionals.
