The Pioneers

Of the Plywood industry were Venesta Ltd.; they held the premier position then because there were no competitors. Now, in the face of increasing competition from almost every country in the world, they hold it still—indisputably.

VENESTA PLYWOOD

It is in constant demand by the British and Allied Governments, the largest Shipbuilding and Railway Companies, Aeroplane & Motor Car Builders, etc. It is waterproof, unshrinkable, and practically indestructible, and these qualities, together with its smooth, clean surface, make it the finest material in the world for panelling of every description.

UNIVERSAL DRAFTING MACHINES.

When time presses, the Universal Drafting Machine proves its greatest worth. It is a remarkable aid to clearness of thought, accuracy and rapidity of expression. It considerably increases the efficiency of a draftsman owing to its accuracy and easy sensitive motion.

All our draftsmen use them; we could not afford to have our drawings made by the old method.

May we send YOU particulars?

The illustration is framed by a decorative border with a repeating pattern. At the top center, a winged figure with a caduceus-like staff is labeled 'TRADE MARK'. Below this, a biplane is shown in flight, emitting a large, stylized cloud of smoke or exhaust. The central text is set within a white rectangular area. The word 'Austin' is written in a large, flowing script. Below it, 'AIRCRAFT AND AIRCRAFT ENGINES' is printed in a bold, serif font. Underneath, 'THE AUSTIN MOTOR CO. LTD.' and 'BIRMINGHAM' are printed in a smaller, all-caps serif font. The bottom portion of the illustration depicts a stone-walled village with a church spire, a stone bridge over a stream, and a road leading into the distance. The artist's signature 'ZENNOR W. CORNWALL' is located in the bottom right corner of the illustration.

BURTON, GRIFFITHS & Co., Ltd., 1, Ludgate Square London, Ludgate Hill, E.C.4.
Also at Birmingham, Manchester, and Glasgow.

Now Ready! Latest List of B.S.A. Twist Drills.

THE latest catalogue of B.S.A. High-Speed Twist Drills is a book of reference which should be found in every machine shop. It illustrates and describes a complete range of drills of every type and size to meet all requirements, and also contains some valuable information and hints on the use and care of twist drills. The cut-out index enables any part of the list to be easily and quickly found. Everyone interested in twist drills should send at once for a copy.

B.S.A. High-Speed Twist Drills are made with the well-known B.S.A. material, workmanship and finish. Thousands of them are daily employed in the manufacture of B.S.A. Productions, and every drill bearing the B.S.A. name is guaranteed to be of identically the same high quality as those used in the B.S.A. Works.

Aeroplane Models

THE Silver Model of an Aeroplane illustrated shows how technical knowledge and skilled workmanship are allied in the models produced by the Goldsmiths and Silversmiths Company.

Infinite care is taken to ensure every detail being accurate and of proper proportions, and to reproduce an exact replica of the original.

Models can be prepared from the original or from a photograph. Estimates and designs will be submitted free upon application.

The Goldsmiths and Silversmiths Company have no other establishments in Regent Street, Oxford Street, or anywhere else in London, and no branches in the Provinces or Abroad.

ANNOUNCEMENT

The SCEPTRE AVIATION Co., Ltd.

CONTRACTORS TO THE AIR MINISTRY.

Dudden Hill Lane, Willesden, N.W. 10

MANAGING DIRECTOR - N. LEWIN.

Telephone:—WILLESDEN 642 & 643 (2 lines)

Telegrams:—“SUPAVICOL, CRICK, LONDON.”

When we adopted the name of the Super Aviation Co., Ltd., we had no idea it was likely to clash with another Company's name, but it having been suggested some confusion has arisen by reason of the adoption of the word “Super,” and having no desire that this should be the result, we immediately offered to change our name on the matter being brought to our notice.

We therefore publish this announcement to acquaint our many customers that in future this business will be known as THE SCEPTRE AVIATION CO., LTD., and feel sure you will realise that though changed in name—the nature of the organisation remains the same—The Sceptre Aviation Co., Ltd., is as keenly anxious as ever to give you satisfactory service and to preserve your valued good-will.

99%
Ninety-nine per cent of the Magnetos fitted to Rotary Engines for fighting, scouting, and observation planes, are of 'M-L' manufacture.

M-L Magnetos are lighter and smaller (yet stronger) than any pre-war magnetos of same electrical capacity. They are of British design and built by British labour in a British-owned factory. They have been supplied in large numbers for work of national importance.

The M-L Magneto, Type A.D.S., is designed for use on rotary or other engines in which the distributor is carried on the engine itself and does not form a part of the magneto. It is fitted with an "H" armature and gives two sparks per revolution.
