Making the Body Beautiful

A Cultural History of Aesthetic Surgery
Sander L. Gilman

Sander Gilman presents the first systematic world history of aesthetic surgery. He argues that aesthetic surgery has such universal appeal because it helps people to "pass," to be seen as a member of a group with which they want to or need to identify.

"A fascinating and provocative book..."

The Nazi War on Cancer

Robert N. Proctor

Nazi doctors committed countless atrocities as part of Hitler's warped quest to create a German master race. Robert Proctor recently made the explosive discovery, however, that Nazi Germany was also decades ahead of other countries in promoting health reforms that we today regard as progressive and socially responsible. He concludes that the Nazis' forward-looking health activism ultimately came from the same twisted root as their medical crimes: the ideal of a racial utopia reserved exclusively for pure and healthy Germans.

"Proctor's provocative book is highly recommended. . . ."
