triple-vitamin routine

in psychological illness

Loss of appetite, gastro-intestinal upsets and skin affections are commonly met with as symptoms or complications of mental disorder. Such conditions may well reflect a deficiency of one or more of the principal water soluble vitamins—B₁, C and nicotinic acid—and these are the three vitamins combined in Nicorbin Tablets. Three Nicorbin Tablets daily provide adequate nutritional amounts of aneurine, ascorbic acid and nicotinic acid. The vitamin B₁ stimulates the patient's appetite; vitamin C affords protection against sub-scorbutic lesions to which the aged patient and others on restricted diet are particularly prone; nicotinic acid is effective in many cases of sore tongue, diarrhoea and dermatitis and is, of course, the specific pellagra-preventing factor. Nicorbin therefore has well-defined applications in the mixed nutritional deficiency states so often associated with psychological illness.

ST. ANDREW'S HOSPITAL

FOR NERVOUS AND MENTAL DISORDERS

NORTHAMPTON

President: THE MOST HON. THE MARQUESS OF EXETER, K.G., C.M.G., A.D.C.

Medical Superintendent: THOMAS TENNENT, M.D., F.R.C.P., D.P.H., D.P.M.

This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients, and certified patients of both sexes are received for treatment. Careful clinical, bio-chemical, bacteriological, and pathological examinations. Private rooms with special nurses, male or female, in the Hospital or in one of the numerous villas in the grounds of the various branches can be provided.

WANTAGE HOUSE

This is a Reception Hospital in detached grounds with a separate entrance, to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Vichy Douche, Scotch Douche, Electrical baths, Plombières treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-Ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-Frequency treatment. It also contains Laboratories for biochemical, bacteriological, and pathological research. Psychotherapeutic treatment is employed when indicated.

MOULTON PARK

Two miles from the Main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

BRYN-Y-NEUADD HALL

The seaside house of St. Andrew's Hospital is beautifully situated in a Park of 330 acres at Llanfair-fechan, amidst the finest scenery in North Wales. On the North-West side of the Estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The Hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts, such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 2356 and 2357 Northampton), who can be seen in London by appointment.

HEIGHAM HALL, NORWICH

MENLEY & JAMES, LTD., 123 COLDHARBOUR LANE, LONDON, S.E.5

625

For Smith, Kline & French Laboratories

In depressive conditions 'Dexedrine' may be relied on to increase the patient's accessibility to treatment, to effect a remarkable improvement in mood and outlook, and to aid him in regaining a normal grip on life and living. The striking preponderance of its central nervous effect over its weak peripheral activity makes 'Dexedrine' virtually a single-action drug. Patients are ordinarily spared the disturbing consciousness of 'drug stimulation,' and thus 'Dexedrine' is especially suitable for the highly-strung, the emotionally unstable, convalescents, men and women undergoing the climacteric, and the aged.

'DEXEDRINE'

TABLETS

(5 mg. dextro-amphetamine sulphate)

Greatest
anti-convulsant action,
least hypnotic effect

EPTOIN is a preparation of soluble phenytoin supplied as sugar-coated tablets containing 0.1 gm. for the treatment of epilepsy. It possesses powerful anti-convulsant action and low hypnotic effect. Clinical results indicate that Eptoin greatly reduces the number of seizures in cases which have proved refractory to other forms of therapy.

ELIXIR GABAIL

(BROMO-VALERIANATE)

The Ideal Sedative in all Nervous Affections

Elixir Gabail combines the sedative action of Bromide and Chloral Hydrate with the nervine and anti-spasmodic deodorised Valerianate. Pharmaceutically it is as pleasant and palatable as it is efficacious from the therapeutic standpoint, the disagreeable odour and flavour of the Valerian having been completely removed without in any way impairing its therapeutic value.

In Hysteria and Psychasthenia it relieves nervous excitement and produces a calm state of mind that is conducive to rapid recovery. It is also of value in states of temporary emotional excitement, in Hypochondriasis and Melancholia.

Dosage: One tablespoonful in water twice or thrice daily. As a hypnotic: two tablespoonfuls in water at bedtime.

Supplied in bottles of 187 c.c. and in bulk for Hospital use.

Literature and Samples on request.

THE ANGLO-FRENCH DRUG Co. Ltd.
11-12, Guilford Street, London, W.C. 1

TRADE MARK

'SONERYL' BRAND
butobarbitone

short
sedation to
prolonged narcosis

One of the advantages of 'Soneryl' is the ease with which, by graduating the dose, the degree of action may be varied from the mildly sedative to the deeply hypnotic.

This is of particular interest in psychiatric practice for it enables the one drug to be used as a hypnotic in all the mental states from simple anxiety to intractable psychosis. It may be given for long periods with the minimal side-effects.

Generally 'Soneryl' is given orally in tablets (grains $1\frac{1}{2}$ in each), but for cases where it is impracticable to give the drug by mouth, suppositories containing three, five or ten grains of 'Soneryl' are available.

Supplies: Tablets in containers of 12, 25, 100 and 500
Suppositories in boxes of 5
