### About the Wallace Center

The Henry A. Wallace Center for Agricultural & Environmental Policy at Winrock International uses its expertise in research, policy analysis, and development to foster sustainable and equitable agriculture and food systems. To achieve this mission, the Wallace Center works to: measure the impacts of agricultural policy and offer appropriate policy recommendations; offer policy alternatives for sound natural resources management; understand the driving forces and the environmental and social impacts of an industrialized food system; and educate, empower, and increase participation in the food system, especially by local rural communities. Formerly the Henry A. Wallace Institute for Alternative Agriculture, established as a private, nonprofit organization in 1983, the Institute joined Winrock International Institute for Agricultural Development in January 2000. The Wallace Center is supported by donations and grants from foundations, corporations, and individuals; competitive research awards; and publication sales.
