# The Journal of Laryngology and Otology

(FOUNDED in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY  
WALTER HOWARTH

ASSISTANT EDITOR  
G. H. BATEMAN

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgement must be made.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced. Captions to illustrations should be typed on a separate sheet and sent at the same time as original photographs, etc.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951) *J. Laryng.*, 65, 33. Abbreviations of Journals should follow the style recommended in *World Medical Periodicals*, published by World Health Organization, 1952.

It is most important that authors should verify *personally* the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Illustration blocks are provided free up to the limit of £10 per article; beyond this authors are expected to pay half the cost. Coloured illustrations will be charged in full to authors.

Blocks will normally be held by the Printers for three years after which they will be destroyed. Any author who has borne a part of the cost of his blocks is entitled to have these returned to him, but a request for this must be sent within three years of the appearance of the article, to HEADLEY BROTHERS LTD., 109 Kingsway, London, WC2.

5. Orders for reprints must be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Authors of original communications on Oto-Laryngology in other journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

7. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS LTD., 109 Kingsway, London, WC2.

8. The annual subscription is four guineas sterling (U.S.A. \$13) post free, and is payable in advance.

9. Single copies will be on sale at 10s. od. each; copies of parts up to Vol. LXIII which are available may be purchased at 7s. 6d. each.

10. All subscriptions, advertising and business communications should be sent to the publishers, HEADLEY BROTHERS LTD., 109 KINGSWAY, LONDON, WC2.

#### *United States of America*

Orders for this *Journal* may be sent through local bookseller, or to STECHERT-HAFNER, INC., 31-33 East 10th Street, New York, or direct to the publishers, HEADLEY BROTHERS LTD., 109 KINGSWAY, LONDON, WC2, England.

“I know my patients get the best possible choice of aids with Ingrams. Ingrams don’t make aids—they are Independent Suppliers of all the best makes. This means the patient can compare one make against another, Ingrams can advise impartially about each make, and the patient gets the best possible fitting. Patients like it and I can rely on Ingrams.

Ingrams have at Shepherd Street one of the best equipped consulting rooms I’ve ever seen. Their Speech Audiometry equipment, for example, is outstanding. They also do domiciliary visits throughout the country—a lot of my patients like this, especially those outside London.”

# 5 drops

## for the removal of EAR WAX

Cerumol avoids discomfort to the patient, inconvenience to the doctor and saves time for both.

Cerumol is now routinely used in most hospitals and general practices throughout the country.

Satisfactory results confirm that it is the most efficient agent yet introduced for the purpose and that it is exceptionally reliable and safe.

In 10-30 minutes the softened or disimpacted wax can usually be wiped out with a probe tipped with cotton wool, or by gentle syringing.

Patients can readily be instructed to instil the drops themselves and, in many cases, the loosened wax will run out of its own accord, rendering further attendance at the surgery unnecessary.

# CERUMOL

Regd TRADE MARK

Active constituents per 100 ml.

p-dichlorbenzene B.P.C.	2 G.
Benzocaine B.P.	2.7 G.
Chlorbutol B.P.	5 G.

## POST-TONSILLECTOMY COMFORT

### Immediate pain relief—Speedier Convalescence

The pain of traumatized tissues following tonsillectomy, demands its own relief—and points the need for analgesia that quickly reaches the irritated area.

ASPERGUM provides 'salivary analgesia' through the simple act of chewing—it brings pain-relieving acetylsalicylic acid into *intimate* and *prolonged* contact with the tonsillar

region, seldom reached even intermittently by gargling. The rhythmic stimulation of muscular action also aids in relieving local spasticity & stiffness: more rapid tissue repair is promoted. Each pleasantly flavoured chewing gum tablet provides  $3\frac{1}{4}$  grains acetylsalicylic acid, permitting frequent use. Particularly suitable for children.

## Aspergum (Category S)

for more than two decades a dependable  
and welcome aid to patient-comfort

*Ethically promoted in packages of 16 tablets and moisture proof bottles of 36 and 250*
