JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800014835 Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR
DR J. P. DOUGHERTY
Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS
PROF. D. BERSHADER
Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, *USA*

DR E. INFELD
Institute of Nuclear Research, Hoza 69, *PL*-00-681, *Warsaw, Poland*

PROF. P. K. KAW
Institute for Plasma Research, Bhat, Gandhinagar 382 424, *India*

PROF. W. B. THOMPSON
Department of Physics, University of California, La Jolla, California 92093, *USA*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

Copying

This journal is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of $05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/90 $5.00 + .00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and Journals Department, 40 West 20th Street, New York, NY 10011.

Three parts form a volume. The subscription price (which includes postage) of Volumes 43 and 44 (1990) is £105.00 net UK, £108.00 elsewhere per volume (US $227.50 in the USA and Canada) for institutions; £52.50 (US $166.50) per volume for individuals. Single parts cost £38.00 each (US $79.00 in the USA and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, NY, and at additional mailing offices. *POSTMASTER*: send address changes in USA, and Canada to *Journal of Plasma Physics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573.

CONTENTS TO VOLUME 43

PART 1 FEBRUARY 1990

Electrostatic-field fluctuations and form factors in multi-component non-equilibrium plasmas. V. V. BELYI and I. PAIVA-VERETENNICOFF 1

Excitation of long-wave quasi-perpendicular electrostatic ion-cyclotron waves in multi-species weakly ionized plasmas. B. S. MILIĆ 23

Electromagnetic waves in a plasma waveguide. S. T. IVANOV and E. G. ALEXOV 51

The effect of random Alfvén waves on the propagation of hydromagnetic waves in a finite-beta plasma. H. HAMABATA and T. NAMIKAWA 69

On the existence of transverse MHD oscillations in an inhomogeneous magnetoplasma. A. N. WRIGHT 83

On waves in spatially cyclic equilibria. D. A. DIVER, E. W. LAING and C. C. SELLAR 101

Mode conversion and transmission in spatially cyclic fields. D. A. DIVER and E. W. LAING 107

Motion of a single charged particle in electromagnetic fields with cyclotron resonances. B. WEYSSOW 119

Energetics of compressible models of fast steady-state magnetic reconnection. M. JARDINE and E. R. PRIEST 141

Self-consistent treatment of cyclotron resonances in inhomogeneous plasmas. B. M. HARVEY and E. W. LAING 151

PART 2 APRIL 1990

Scattering of electromagnetic waves by anomalous fluctuations of a magnetized plasma. V. N. PAVLENKO and V. G. PANCHENKO 165

An approach to the collisional heating rates of an anisotropic plasma. R. HERNÁNDEZ 173

Excitation of surface waves in magnetohydrodynamics. B. K. SHIVAMOGGI 183

Kinetic equations for a non-uniform plasma in strong fields and resulting particle transport. A. H. ØIEN 189

Quasi-static evolution of a dissipative plasma column in vacuum. C. LO SURDO 217

Higher-order electron modes in a two-electron-temperature plasma. R. L. MACE and M. A. HELLBERG 239

https://doi.org/10.1017/S0022377800014835 Published online by Cambridge University Press

Oblique stability of circularly polarized MHD waves. E. MJØLHUS and T. HADA 257

Alternative representation of the dielectric tensor for a relativistic magnetized plasma in thermal equilibrium. P. H. YOON and R. C. DAVIDSON 269

A theory of the relaxation of tokamak discharges. J. E. BRANDENBURG 283

Two-dimensional generalizations of the Newcomb equation. R. L. DEWAR and A. PLETZER 291

Collisional relaxation of relativistic and degenerate electrons. S. HINATA and H. KISHI 311

PART 3 JUNE 1990

Inhomogenity effects on the absorption of electromagnetic high-frequency waves by magnetized Maxwellian plasmas. R. A. CALDELA FO, R. S. SCHNEIDER and L. F. ZIEBELL 335

Relaxed states in a spheromak with inhomogeneous boundary fields. A. M. DIXON, P. K. BROWNING, M. K. BEVIR, C. G. GIMBLETT and E. R. PRIEST 357

Wave properties of an ion-beam system with a strong magnetic field. K. NAIDU, G. P. ZANK and J. F. MCKENZIE 385

A numerical study of strongly nonlinear plasma motion in a magnetic octupole field. H. G. ERIKSSON and C. WAHLBERG 397

Compact toroid formation, dynamics and lifetime in collisional plasma generated at high fill pressures. J. C. DOOLING, T. M. YORK, M. NIIMURA, F. AGHAMIR, F. B. MEAD and D. R. SHIEH 419

Parametric decay in a two-electron-temperature plasma. S. GUHA and M. ASTHANA 451

Parametric excitation of a kinetic Alfvén wave at the ion-cyclotron frequency. Z. HASAN and S. GUHA 457

The effect of a static magnetic field on the growth of a rippled electromagnetic beam. A. SINGH and T. SINGH 465

Energy budget of stable magnetohydrodynamic waves in an inhomogeneous heat-conducting plasma in a strong magnetic field. A. DE LA TORRE 475

BOOK REVIEW

Transport Processes in Plasmas. Vol. 1: Classical Transport. Vol 2: Neoclassical Transport, by R. Balescu 483
