JFM ARCHIVE

Journal of
Fluid Mechanics
Digital Archive
1956–1996

*Vital research from
the definitive source*

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

JOURNALS

The European Physical Journal - Applied Physics

Marketed and distributed on behalf of ÉDP Sciences

Editor-in-Chief

B. Drévillon, LPCIM, France

EPJ-AP is an international journal devoted to the promotion of the recent progresses in all fields of applied physics. The articles published in *EPJ-AP* span the whole spectrum of applied physics research including semiconductors, organic materials, thin films, nanotechnology, photonics, spintronics, magnetism, plasma, energy generation transfer, metrology, fluids and microfluidics, biophysics and biosensors, surfaces and interfaces.

European Journal of Applied Mathematics

Co-Editors-in-Chief

S. D. Howison, *University of Oxford, UK*

A. A. Lacey, *DPMMS, Heriot-Watt University, UK*

M. J. Ward, *University of British Columbia, Canada*

Since 2008 *EJAM* surveys have been expanded to cover Applied and Industrial Mathematics. Coverage of the journal has been strengthened in probabilistic applications, while still focusing on those areas of applied mathematics inspired by real-world applications, and at the same time fostering the development of theoretical methods with a broad range of applicability. Survey papers contain reviews of emerging areas of mathematics, either in core areas or with relevance to users in industry and other disciplines. Research papers may be in any area of applied mathematics, with special emphasis on new mathematical ideas, relevant to modelling and analysis in modern science and technology, and the development of interesting mathematical methods of wide applicability.

CAMBRIDGE
UNIVERSITY PRESS

Journal of Mechanics

Published on behalf of The Society of Theoretical and Applied Mechanics, R.O.C.

Editor-in-Chief

K. C. Wu, National Taiwan University, Taiwan

The objective of the *Journal of Mechanics* is to provide an international forum to foster exchange of ideas among mechanics communities in different parts of world.

The Journal publishes original research in all fields of theoretical and applied mechanics.

The *Journal of Mechanics* especially welcomes papers that are related to recent technological advances, such as micro/nanomechanics, medical and biological systems, and microscale heat transfer. The contributions, which may be analytical, experimental or numerical, should be of significance to the progress of mechanics. Papers which are merely illustrations of established principles and procedures will generally not be accepted. Reports that are of technical interest are published as Short articles. Review articles are published only by invitation.

UNIVERSITY PRESS

475 Time-resolved flow dynamics and Reynolds number effects at a wall–cylinder junction
N. Apsilidis, P. Diplas, C. L. Dancey & P. Bouratsis

512 Heat transfer in a turbulent channel flow with square bars or circular rods on one wall
S. Leonardi, P. Orlandi, L. Djenidi & R. A. Antonia

531 Bouncing on thin air: how squeeze forces in the air film during non-wetting droplet bouncing lead to momentum transfer and dissipation
J. de Ruiter, R. Lagraauw, F. Mugele & D. van den Ende

568 A numerical study of a weakly stratified turbulent wake
J. A. Redford, T. S. Lund & G. N. Coleman

JFM Rapids (online only)

R1 Simple and efficient representations for the fundamental solutions of Stokes flow in a half-space
Z. Gimbutas, L. Greengard & S. Veerapaneni

R2 Rheology of dense suspensions of non-colloidal spheres in yield-stress fluids
S. Dagois-Bohy, S. Hormozi, É. Guazzelli & O. Pouliquen

S indicates supplementary data or movies available online.

- 1 Pipe flow clogged with turbulence
Y. Duguet
- 5 Local interfacial stability near a zero vorticity point
Y.-H. Tseng & A. Prosperetti
- 37 The effects of surface tension on the initial development of a free surface adjacent to an accelerated plate
J. Uddin & D. J. Needham
- 74 Non-isothermal droplet spreading/dewetting and its reversal
Y. Sui & P. D. M. Spelt
- 96 Large-scale mean patterns in turbulent convection
M. S. Emran & J. Schumacher
- 109 Topological effects on vorticity evolution in confined stratified fluids
R. Camassa, G. Falqui, G. Ortenzi & M. Pedroni
- 137 Experimental study on bubble dynamics subject to buoyancy
A. M. Zhang, P. Cui, J. Cui & Q. X. Wang
- S 161 Numerical investigation of flow and turbulence structure through and around a circular array of rigid cylinders
K. Chang & G. Constantinescu
- 200 On the transition between regular and irregular shock patterns of shock-wave/boundary-layer interactions
J. Matheis & S. Hickel
- 235 A coherence-matched linear source mechanism for subsonic jet noise
Y. B. Baqui, A. Agarwal, A. V. G. Cavalieri & S. Sinayoko
- S 268 Weakly nonlinear stability analysis of polymer fibre spinning
K. Gupta & P. Chokshi
- 290 On steady non-breaking downstream waves and the wave resistance
D. V. Maklakov & A. G. Petrov
- S 316 On the distribution of leading-edge vortex circulation in samara-like flight
E. Limacher & D. E. Rival
- 334 Effect of external noise on the hysteresis characteristics of a thermoacoustic system
E. A. Gopalakrishnan & R. I. Sujith
- 354 Linear stability of Taylor–Couette flow of shear-thinning fluids: modal and non-modal approaches
Y. Agbessi, B. Alibenyahia, C. Nouar, C. Lemaitre & L. Choplin
- 390 Electro-osmosis of superimposed fluids in the presence of modulated charged surfaces in narrow confinements
S. Mandal, U. Ghosh, A. Bandopadhyay & S. Chakraborty
- 430 Early-time periodic injection and extraction in an inclined confined aquifer
P. Dudfield & A. W. Woods
- 458 Mixing by bubble-induced turbulence
E. Alméras, F. Risso, V. Roig, S. Cazin, C. Plais & F. Augier
