Continued from back cover

Electromagnetic and electrostatic waves in a multi-component plasma near the lower hybrid frequency
M. HAMELIN and C. BEGHIN *page* 115

The Green's function for waves in a homogeneous anisotropic absorbing plasma
J. A. BENNETT 133

A ray expansion with matrix coefficients for sources in absorbing anisotropic media
J. A. BENNETT 151

Lagrangian density for a collisional plasma
Y.-K. M. PENG 165

JOURNAL OF PLASMA PHYSICS

Volume 15 Part 1 February 1976

CONTENTS

The method of averaged Hamiltonian and the two-stream explosive instability
Z. SEDLÁČEK *page* 1

General stability analysis of force-free fields. Part 1. General theory
J. KRÜGER 15

General stability analysis of force-free fields. Part 2. Application to continuous and discrete spectra of α
J. KRÜGER 31

Collisional destruction of Bernstein modes in the high-frequency regime
W. ALLEN and J. J. SANDERSON 41

A Hamiltonian formulation in electrodynamics of charged moving fluids
I. MERCHES 49

The importance of trapping in strong plasma turbulence
P. ROLLAND 57

Effect of wave–particle interaction on recurrence of nonlinear ion wave
S. WATANABE 67

Temperature anisotropy instabilities in a plasma of two ion components
D. S. LEMONS and S. P. GARY 83

Nonlinear interaction between two electrostatic harmonics in a plasma
F. VERHEEST and G. J. LEWAK 91

Drift instabilities in anti-loss-cone plasmas
B. BUTI 105
