## **The Origin of the Earth.** (The University of Chicago Science Series.) By THOMAS CHROWDER CHAMBERLIN, Head of the Department of Geology in the University of Chicago.

This book, by one of the leading geologists of the world, sets forth the disclosures that led to the rejection, one after another, of the older views of the origin of our planet, the futile attempts then made to emend these or to build others upon the same foundations, the final rejection of all these, and the construction of a radically new view based on a new dynamic foundation. The later chapters of the book treat of the early stages of the earth and of the way in which its leading processes took their start from their cosmogonic antecedents, these being held to be essential factors in the genesis of the planet. The beginning of the inquiry is set forth in the Introduction; the successive chapters are entitled: "The Gaseous Theory of Earth-Genesis in the Light of the Kinetic Theory of Gases"; "Vestiges of Cosmogonic States and Their Significance"; "The Decisive Testimony of Certain Vestiges of the Solar System"; "Futile Efforts"; "The Forbidden Field"; "Dynamic Encounter by Close Approach"; "The Evolution of the Solar Nebula into the Planetary System"; "The Juvenile Shaping of the Earth"; "Inner Reorganization of the Juvenile Earth"; "Higher Organization in the Great Contact Horizons."

xii + 272 pages, 12mo, cloth; 6s net.

## **Individuality in Organisms.** (The University of Chicago Science Series.) By CHARLES MANNING CHILD, Associate Professor of Zoölogy in the University of Chicago.

Professor Child's work is an attempt to state, and to present evidence in support of, a conception of the nature of organic individuality which the author has developed as a result of fifteen years of investigation of the processes of reproduction and development in the lower animals. In these forms, organic individuality appears in relatively simple terms, and it is here that we must look for the key to the problem of individuality in the higher animals and man.

The author has addressed himself with remarkable success to showing the wide range of applicability of the conception of individuality of various fields, with the result that the book appeals not only to the physiologist and to the botanist, but also to the neurologist, to the psychologist, and even to the sociologist.

x + 212 pages, small 12mo, cloth; 5s net.

# CONTENTS

## No. 1 (OCTOBER)

	PAGE
HARRISON, LAUNCELOT. The Genera and Species of Mallophaga . . .	1

## No. 2 (FEBRUARY)

NICOLL, WILLIAM. Observations on the Influence of Salt and other Agents in modifying the Larval Development of the Hook-worms: <i>Ankylostoma duodenale</i> and <i>Necator americanus</i> . . .	155
WATERSTON, JAMES. Notes on the Morphology of Chalcidoidea bred from Calliphora. (With 2 Text-figures) . . . . .	190
WATERSTON, JAMES. A new African Louse ( <i>Polyplax calva</i> n. sp.) from <i>Cricetomys</i> . (With 2 Text-figures) . . . . .	199
BOULENGER, CHARLES L. Sclerostome Parasites of the Horse in England. II. New Species of the Genus <i>Cylichnostomum</i> . (With 5 Text-figures) . . . . .	203
STEWART, F. H. On the Development of <i>Ascaris lumbricoides</i> Lin. and <i>Ascaris suilla</i> Duj. in the Rat and Mouse. (With Plate I and 9 Text-figures) . . . . .	213
BACOT, A. A Contribution to the Bionomics of <i>Pediculus humanus (vestimentis)</i> and <i>Pediculus capitis</i> . (With 4 Text-figures) . . .	228
HINDLE, E. Notes on the Biology of <i>Pediculus humanus</i> . (With a Foreword by Geo. H. F. Nuttall, F.R.S.) . . . . .	259
SWELLENGREBEL, N. H. and WINOTO, RADEN MAS MANGKOE. The Life History of Amoebae of the <i>Limax</i> Type in the Human Intestine. (With Plate II and 1 Text-figure) . . . . .	266
MACFIE, J. W. SCOTT. Urethral Spirochaetosis. (With 4 Text-figures and 1 Chart) . . . . .	274

	P.
NUTTALL, GEORGE H. F. Studies on <i>Pediculus</i> . I. The copulatory apparatus and the process of copulation in <i>Pediculus humanus</i> . (With Plates III and IV and 12 Text-figures) . . . . .	4

### NO. 3 (MAY)

KEILIN, D. Recherches sur les Anthomyides à Larves Carnivores. (Avec les planches V à XV et XLI figures dans le texte) . . . . .	3
--	---

### NO. 4 (JULY)

SWELLENGREBEL, N. H. Observations on <i>Blastocystis hominis</i> . (With Plates XVI and XVII) . . . . .	4
SKRJABIN, K. I. Sur quelques Nématodes des Oiseaux de la Russie. (Avec les Planches XVIII et XIX et une figure dans le texte) . . . . .	41
ATKIN, E. E. and BACOT, A. The Relation between the hatching of the Eggs and the Development of the Larvae of <i>Stegomyia fasciata</i> ( <i>Aedes calopus</i> ), and the presence of Bacteria and Yeasts . . . . .	48
GOODEY, T. and WELLINGS, A. W. Observations on <i>Entamoeba gingivalis</i> from the Human Mouth, with a Note on the Trichomonad Flagellate <i>Tetratrichomonas buccalis</i> n. sp. (With Plates XX—XXII) . . . . .	52
YOSHIDA, SADAŌ. Some Cestodes from Japanese Selachians. Including Five New Species. (With Plate XXIII and 4 Text-figures) . . . . .	56
SCOTT, HUGH. Notes on Nycteribiidae, with Descriptions of Two New Genera. (With Plate XXIV) . . . . .	59
INDEX OF AUTHORS . . . . .	61
INDEX OF SUBJECTS . . . . .	61
