At the request of many subscribers, a complete Index for the years 1921-1930 has been prepared. This has been a very considerable undertaking, but it was thought that it would be most valuable for purposes of reference. Unfortunately, very many subscribers have not as yet availed themselves of it, and it is hoped that those who have not already asked for a copy will order one as soon as possible from the publishers Messrs. Oliver & Boyd Ltd. The price of the Index is Ten Shillings.

Peroral Endoscopy Table

Designed and built at Chiron Works for King's College Hospital

This table is arranged for nasal and aural operations as well as for endoscopic work.

The back rest is adjustable from the dependant position shown in the illustration to one nearly at right angles to the top of the table for nasal operations, in which case a suitable head rest is attached.

The table is adjustable in height and can be tilted in either direction and is absolutely rigid in any position. Further particulars furnished on request.
