THE MATHEMATICAL ASSOCIATION, which was founded in 1871, as the *Association for the Improvement of Geometrical Teaching*, aims not only at the promotion of its original object, but at bringing within its purview all branches of elementary mathematics.

Its purpose is to form a strong combination of all persons who are interested in promoting good methods of teaching mathematics. The Association has already been largely successful in this direction. It has become a recognised authority in its own department, and is continuing to exert an important influence on methods of examination.

"THE MATHEMATICAL GAZETTE" (published by Messrs. G. BELL & SONS, LTD.) is the organ of the Association. It is issued at least five times a year. The price per copy (to non-members) is usually 4s.

The *Gazette* contains articles, notes, reviews, etc., dealing with elementary mathematics, and with mathematical topics of general interest.
