"Please note a variation in the intended rate of production of the Bulletin. ONLY ONE volume (volume 20) will be published in 1979, although subscribers paid for two volumes (volumes 20 and 21). This change will be rectified in 1980 when volumes 21 and 22 will appear AND subscribers will be charged for VOLUME 22 ONLY in respect of that year.  
We much regret any inconvenience caused to our customers by the above re-scheduling, and would like to emphasize that these changes have been made necessary by causes beyond our control".

Mordechai Lewin	<i>On a certain kind of reducible rational fractions</i>	321
G. Karpilovsky	<i>On certain group ring problems</i>	329
Sribatsa Nanda and Sudarsan Nanda	<i>A nonlinear complementarity problem in Banach space</i>	351
I. L. Reilly and M. K. Vamanamurthy	<i>On hereditarily Lindelöf spaces</i>	357
Peter Frankl	<i>On intersecting families of finite sets</i>	363
R. A. Maller	<i>On one-sided boundedness of normed partial sums</i>	373
R. A. Maller	<i>An extension of Kesten's generalised law of the iterated logarithm</i>	393
Eric C. Nummela	<i>The completion of a topological group</i>	407
Sadayuki Yamamuro	<i>Notes on the inverse mapping theorem in locally convex spaces</i>	419
Alain Durand	<i>Simultaneous diophantine approximations and Hermite's method</i>	463

#### Abstracts of Australasian PhD theses

Michael John Sculley	<i>The colloid physics of photosynthetic membranes</i>	471
Judith A. Ascione	<i>On 3-groups of second maximal class</i>	473
G. A. Chandler	<i>Superconvergence of numerical solutions to second kind integral equations</i>	475
J. W. Paine	<i>Numerical approximation of Sturm-Liouville eigenvalues</i>	477
Stuart F. Crosbie	<i>The mathematical modelling of capture-mark-recapture experiments on animal populations</i>	479

### INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after being evaluated by the Editor and an Associate Editor or another expert. Of course responsibility for the correctness of results published in the BULLETIN remains with the authors.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to

The Editor,  
Bulletin of the Australian Mathematical Society,  
Department of Pure Mathematics,  
La Trobe University,  
Bundoora, Victoria 3083, Australia

and should retain the original typescript of their papers, as material submitted to the BULLETIN will usually not be returned. Authors should note that each paper must include an abstract of not more than 200 words.

Details of editorial policy are given on the inside back cover.

### Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 3 months of the degree being approved.
