

Oxford University Press

The Distribution of the Human Immunoglobulin Allotypes

Arthur G. Steinberg and Charles E. Cook

In 1976 Oxford published *Distribution of the Human Blood Groups and other Polymorphisms* by A. E. Mourant and his colleagues. Because of the complexity and size of the task, this book omitted two major genetic markers in blood: the immunoglobulin polymorphisms and the HLA system. This new book deals with the former. £27.50

Oxford Monographs on Medical Genetics

The Development of the Vertebrate Limb

An Approach through Experiment, Genetics, and Evolution

J. R. Hinchliffe and D. R. Johnson

Starting with a sketch of the evolutionary history of the pendent limb, the authors describe and analyse the processes of limb development, first at the level of tissue interaction and then at the level of pattern formation. Illustrated £20

Genes and the Mind: Inheritance of Mental Illness

Ming Tsuang and Randall Vandermeij

The explosion of knowledge in the understanding of the biological and genetic aspects of mental illness has reached a point where discovery of the causes of some mental disorders seems to be within reach. This book concentrates on one area of biological research in psychiatry, namely the study of genes and their role in the development and transmission of mental illness. £4.95

The Theory of Plant Breeding

O. Mayo

This book gives an account of plant-breeding theory that is accessible both to plant breeders seeking the genetical bases of their work and to geneticists seeking applications of genetical principles in plant breeding. It gives a coherent account of existing genetical theory for advanced students, researchers, and practitioners of plant breeding. Illustrated £24

ANNOTATED BIBLIOGRAPHIES

These are duplicates of bibliographies prepared on request at the Commonwealth Bureau of Animal Breeding and Genetics, The King's Buildings, West Mains Road, Edinburgh, EH9 3JX, Scotland. In addition to the full title reference, the abstract published in *Animal Breeding Abstracts* is reproduced. Supplementary bibliographies (marked A, B, etc.) are prepared from time to time to bring some of the earlier ones up to date. The bibliographies can be obtained on application to the Director. Some of the most recent bibliographies are listed below, but a full list is obtainable from the Bureau.

Number	Subject	Period covered	No. of references	UK Price £	Overseas Price £
354	Multivariate analyses in animal breeding	1972-78	79	4.00	4.80
355	Genetic aspects of wool production and wool characters in sheep	1972-78	186	5.00	6.00
356	The B histocompatibility/blood group locus in the fowl	1970-78	41	3.00	3.60
357	The culture of cattle, sheep and pig ova <i>in vitro</i>	1972-78	88	4.50	5.40
358	Calving interval in cattle and buffaloes including its inheritance and effects on performance	1971-78	222	5.50	6.60
359	Age at first calving in cattle and buffaloes including its inheritance and effects on performance	1971-78	244	5.50	6.60
360	The <i>in vitro</i> fertilisation and culture of the ova of laboratory mammals	1971-78	216	5.50	6.60
361	Genetic and phenotypic variation in body temperature and its association with other traits in farm livestock, poultry and laboratory mammals	1951-78	120	4.50	5.40
362	The genetics of behaviour (excluding sexual behaviour) in laboratory mammals	1938-78	163	5.00	6.00
363	Chemical shearing (defleecing) of sheep	1969-77	30	1.00	1.25
364	Frozen semen in the horse	1968-77	53	2.00	2.60
365	Danish red cattle and their crossbreds in the tropics and subtropics	1971-78	36	1.50	2.00
366	Cage rearing of pigs	1969-78	23	1.00	1.25
367	Chromosome banding in farm livestock, laboratory mammals and poultry	1971-78	124	4.50	5.40
368	Reproductive performance in relation to lactation and early weaning in cattle	1971-78	64	2.50	3.10
369	Pituitary feedback mechanisms in the hormonal control of reproduction in laboratory mammals, farm livestock and poultry	1971-78	110	4.50	5.40
370	Chromosome translocations in farm livestock, laboratory mammals and poultry	1942-78	215	5.50	6.60
371	H-2 restrictions of immune response	1974-78	40	1.50	2.00
372	Hormone receptors in reproduction (farm livestock and laboratory mammals)	1972-78	62	2.50	3.10

NB.: Orders and remittances for the above bibliographies should be sent to the Commonwealth Bureau of Animal Breeding and Genetics, The King's Buildings, West Mains Road, Edinburgh, EH9 3JX, Scotland, or to Central Sales, Commonwealth Agricultural Bureaux, Farnham House, Farnham Royal, Slough, SL2 3BN, England. Standing orders may be placed for all bibliographies produced by the Bureau. Following receipt of such orders, the Bureau automatically sends all new bibliographies to the subscriber, along with the appropriate billing.

Journal of Reproduction & Fertility

K. Herbert & N. W. Bruce. Sequence of implantation and fetal and placental weights in the rat

The *Journal of Reproduction and Fertility* is published every 2 months at £14.50 (U.S. \$32.00) per issue and £75.00 (U.S. \$160.00) per year by the

JOURNALS OF REPRODUCTION AND FERTILITY LTD

22 Newmarket Road, Cambridge CB5 8HU, U.K. (Editorial)

P.O. Box 32, Commerce Way, Colchester CO2 8HP, U.K. (Distribution)

Single parts £8.50 net (in U.S.A. and Canada US \$24.50), plus postage. Three parts form a volume. The subscription price of volumes 35 and 36, 1980 (which includes postage) is £20.00 net per volume (in U.S.A. and Canada US \$57.50).

Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with minimum delay. Second class postage at New York, N.Y.

Orders, which must be accompanied by payment, should be sent to a bookseller or to the publishers, Cambridge University Press, P.O. Box 110, Cambridge CB2 3RL and, in the U.S.A. and Canada, 32 East 57th Street, New York, N.Y. 10022. **POSTMASTER:** send address changes in U.S.A. and Canada to Cambridge University Press, 32 East 57th Street, New York, N.Y. 10022.

Claims for missing issues can only be considered if made immediately after receipt of the subsequent issue.

GENETICAL RESEARCH

VOLUME 36, NUMBER 1, AUGUST 1980

CONTENTS

WADE, MICHAEL J. Effective population size: the effects of sex, genotype, and density on the mean and variance of offspring numbers in the flour beetle, <i>Tribolium castaneum</i>	page 1
