In the Results (Biodiversity surveys section), there is an error in the reported camera-trap encounter rates for mammals, in this sentence: ‘Encounter rates (proportion of cameras that recorded a particular species) for mammals ranged from 0.04 for the Sunda porcupine to 0.22 for the Javan stink badger (Supplementary Table 1b).’ The correct sentence is ‘Encounter rates (proportion of cameras that recorded a particular species) for mammals ranged from 0.02 for the Sunda pangolin to 0.24 for the Javan stink badger (Supplementary Table 1b).’
