

## INTERNATIONAL MORTALITY AND LONGEVITY SYMPOSIUM 2014

15 - 17 September 2014, Birmingham UK

The International Mortality and Longevity Symposium 2014 will focus on improving our ability to forecast future mortality by drawing on the knowledge, insights and techniques of a wide range of specialities including; medics, demographers, epidemiologists and underwriters. This two night residential conference has a reputation for lively discussions and debates, with lots of opportunities for networking with a diverse range of attendees.

The conference aims to expand delegates' horizons by giving a better view of the scope of current mortality research in a wide variety of relevant disciplines, and by providing a forum to discuss the implications for actuarial practice.

### Who should attend?

The International Mortality and Longevity Symposium 2014 will be of interest to all actuaries concerned with pricing or reserving for mortality and longevity, underwriters, demographers, epidemiologists, policy-makers, gerontologists, other medical researchers, and all those with an interest in better understanding and projecting mortality and longevity.

# Journal of Pension Economics & Finance

## Editors

Steven Haberman, *Cass Business School, UK*

Moshe Milevsky, *York University, Canada*

J. Michael Orszag, *Watson Wyatt, UK*

The *Journal of Pension Economics & Finance (JPEF)* is the only academic journal focusing on the economics and finance of pensions and retirement income. The ageing population, together with the shrinking workforce, heralds a growing pensions crisis, which has become a key public policy issue in developed countries and elsewhere. *JPEF* provides a valuable and influential forum for international debate in this area.

The journal publishes original research papers, covering a variety of topics, including pension fund management, the regulation of pensions, and pensions and labour markets.

# Guidelines for Contributors

## Annals of Actuarial Science

*Annals of Actuarial Science* (AAS) is published twice yearly by the Institute and Faculty of Actuaries.

Papers on any area of actuarial research or practice are welcome and will be considered for publication. Suitable topics include, but are not restricted to: new developments in actuarial practice; original research in actuarial science and related fields; or reviews of developments in a field of interest to the actuarial profession.

All papers should be written in English (UK). The style should be reasonably formal, but should be as clear and understandable as possible. Enough information should be included to allow a reader to reproduce any mathematical or numerical results.

All papers are peer-reviewed by anonymous referees appointed by the Editor. Papers may need minor or major revisions before they can be accepted for publication, or they may be considered to be unsuitable for AAS. The Editor's decision is final.

Each paper must include an abstract, keywords, the name and affiliation of all authors and contact details of the corresponding author. The abstract, which should be about 100–200 words, should be written so that others are encouraged to read the paper. It should give the main objectives and conclusions of the paper.

Papers should be submitted electronically to the Editor, using pdf format. If the paper is accepted, a Word or LaTeX version will be required and all diagrams and figures must be provided separately in tif, gif, jpeg or eps format.

All published work must be acknowledged, and references given. The author is responsible for securing written permission to include any copyrighted material. Notwithstanding any scrutiny and any alterations made, authors remain solely responsible for the accuracy of all material provided and views expressed. Papers must not have been copyrighted or submitted for publication elsewhere at the same time as being submitted to AAS. Any previous publication, for example in conference proceedings, must be notified to the editor at the time of submission. If the paper is accepted for publication the author(s) must sign a copyright declaration, transferring copyright to the Institute and Faculty of Actuaries.

All correspondence should be addressed to the Editor below.
