

ERRATA

ANIMAL PRODUCTION, 1966, Vol 8, Part 1

Robertson: A mathematical model of the culling process in dairy cattle

p. 96 two lines from the bottom should read:

“ . . . The proportion selected increases by . . . ”

p. 97 line 13 to commence:

$$\sigma_t | (V_t + \tau^2)^{\frac{1}{2}}$$

line 18 to read:

$$\left(\frac{dq}{dy} \right)_{y = \bar{y}} = \frac{Kz}{\tau}$$

p. 98 six lines from the bottom should be:

$$\frac{1}{\bar{q}} \left(\frac{dq}{dS} \right)_{S = \bar{y}} = \frac{b_g}{b_p} \frac{i}{V_w + \tau^2}$$
