(This article appeared in Volume 25, Number 3, 2008, pp. 469–474).

The abscissa in Fig. 1 (p. 471) was labeled in units of  $\text{cd}/\text{m}^2$ . The correct units are trolands (Td), and a new Fig. 1, so labeled, is shown below.

On p. 473, column 1, the third sentence in the second paragraph under the heading *Effects of stimulus duration* should read as follows:

“The mean  $T_c$ -estimates for their two observers were 33.5 ms for SPP and 49 ms for PPP, compared with 26.3 (SPP) versus 38.4 (PPP) for our controls.”
