of the

AUSTRALIAN MATHEMATICAL SOCIETY

Volume 30 Number 3

December 1984

On second derivative estimates for equations of Monge-Ampere type by Neil S. Trudinger and John I. E. Urbas	321
Does the Frobenius endomorphism always generate a direct summand in the endomorphism monoids of fields of prime characteristic? by Péter Pröhle	335
On orthogonally decomposable ordered Banach spaces by Sadayuki Yamamuro	357
An effective seven cube theorem by R. J. Cook	381
An oscillation theorem for sublinear elliptic differential inequalities by Norio Yoshida	387
Meromorphic starlike univalent functions by V. V. Anh and P. D. Tuan	395
Elementary properties of vector space graphs by Grace Orzech	411
Conditional expectation for operator-valued measures and functions by Brian Jefferies	421
On the codimension of a minimal immersion by Pui-Fai Leung	431
Exponential dichotomy of strongly discontinuous semigroups by P. Preda and M. Megan.	435
An existence theorem for ordinary differential equations in Banach spaces by Bogdan Rzepecki.	449
Length and area inequalities for the derivative of a bounded and holomorphic function by Shinji Yamashita	457
A general denseness result for relaxed control theory by E. J. Balder	463
Author Index Volumes 21 (1980) to 30 (1984)	481
ABSTRACT OF AUSTRALASIAN PhD THESIS	
Solutions of field equations in general relativity with spinor connection by L. A. Peters	477

BULLETIN OF THE AUSTRALIAN MATHEMATICAL SOCIETY

Editor: Sidney A. Morris

Deputy Editor: K. R. Pearson
Honorary Editor: B. H. Neumann

Associate Editors

Robert S. Anderssen	B. J. Gardner	P. E. Kloeden	Ross Street
Alan L. Andrew	J. R. Giles	Rodney Nilsen	G. Szekeres
B. D. Craven	J. R. J. Groves	Sheila Oates-Williams	D. G. Tacon
Brian A. Davey	J. A. Hempel	A. J. van der Poorten	Colin J. Thompson
P. Donovan	D. A. Holton	J. H. Rubinstein	H. B. Thompson
J. A. Eccleston	D. C. Hunt	Leon Simon	Rudolf Vyborny

Assistant Editors

Robert S. Anderssen

M. S. Brooks

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after being evaluated by the Editor and an Associate Editor or another expert. Of course responsibility for the correctness of results published in the BULLETIN remains with the authors.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit **THREE** clean, high quality copies to

Dr S. Oates-Williams,
Department of Mathematics, University of Queensland,
St. Lucia, Queensland, 4067, Australia

but should not send the original typescript of their papers, as material submitted to the BULLETIN will usually not be returned. Authors should note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification.

As even minor revisions are generally not permitted, authors should read carefully all the details listed on the inside back cover.

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.

© **Copyright Statement.** Where necessary, permission to photocopy for internal or personal use or the internal or personal use of specific clients is granted by the Treasurer, Australian Mathematical Publishing Association, Inc., for libraries and other uses registered with the Copyright Clearance Center (CCC), provided that the base fee of \$A2.00 per copy of article is paid directly to CCC, 21 Congress Street, Salem, MA 01970, U.S.A. Special requests should be addressed to the Treasurer, Australian Mathematical Publishing Association, Inc., c/- Department of Mathematics, University of Queensland, St. Lucia, Qld., 4067, Australia. Serial-fee code: 0004-9727/84 \$A2.00 + 0.00

Contents

V. V. ANH and P. D. TUAN, Meromorphic starlike univalent functions	395
EFRAIM P. ARMENDARIZ and JAE KEOL PARK, Compressible matrix rings	295
RAUNO AULASKARI, On the boundary behaviour of Bloch and normal functions	299
E. J. BALDER, A general denseness result for relaxed control theory	463
HEINZ BAUER, Elliptic differential operators and diffusion processes	219
GILLES BLUM, A note on the central limit theorem for geodesic random walks	169
LEO BREWIN, The Regge calculus in numerical relativity [A]*	319
C. J. B. BROOKES and HOWARD SMITH, A remark on products of locally soluble groups	175
A. CARANTI and C. M. SCOPPOLA, Central commutators	67
MARSTON D. E. CONDER, Some results on quotients of triangle groups	73
R. J. COOK, An effective seven cube theorem	381
B. J. DAY, Coproducts of algebras and derivations on categories	153
VICTOR CHARLES DRASTIK, Minimum mean squared error estimation [A]	317
SABER ELAYDI and HANI R. FARRAN, Isometries and certain dynamical systems	239
HANI R. FARRAN, <i>see</i> SABER ELAYDI	
SHALOM FEIGELSTOCK, A note on subdirectly irreducible rings	137
JOHN ANTHONY GEAR, Wave propagation in density stratified fluids [A]	315
BEVIL M. GLOVER, Generalized convexity in nondifferentiable programming	193
K. GOPALSAMY, Some delays do not matter	91
K. GOPALSAMY, Linear systems of nonoscillatory differential equations with delayed arguments	307
M. J. HAMILTON, A finite element approach to molecular vibration [A]	159
GRAHAME HARDY, Nemitsky operators between Orlicz-Sobolev spaces	251
HOWARD HILLER, Almost complex structures on four-dimensional complete intersections	143
LESLIE J. HILLS, Time series in medical research [A]	157
ULRICH HORNING, The mathematics of hysteresis	271
INDEX, Volumes 21-30	481
KRZYSZTOF JAROSZ, A characterization of weak peak sets for function algebras	129
BRIAN JEFFERIES, Conditional expectation for operator-valued measures and functions	421
M. S. KHAN, M. SWALEH and S. SESSA, Fixed point theorems by altering distances between the points	1
FUAD KITTANEH, On the structure of polynomially normal operators	11
VINOD KUMAR and S. L. SHUKLA, On p -valent starlike functions with reference to the Bernardi integral operator	37
PUI-FAI LEUNG, On the codimension of a minimal immersion	431
C. W. LLOYD-SMITH, On a problem of Favard concerning algebraic integers	111
SADAHIRO MAEDA, Real hypersurfaces of a complex projective space II	123
M. MEGAN, <i>see</i> P. PREDÁ	
M. N. NKASHAMA and M. WILLEM, Periodic solutions of the boundary value problem for the nonlinear heat equation	99
GRACE ORZECH, Elementary properties of vector space graphs	411
MORRIS ORZECH, Forms of low degree in finite fields	45
JAE KEOL PARK, <i>see</i> EFRAIM P. ARMENDARIZ	
L. A. PETERS, Solutions of field equations in general relativity with spinor connection [A]	477
P. PREDÁ and M. MEGAN, Exponential dichotomy of strongly discontinuous semigroups	435
PÉTER PRÖHLE, Does the Frobenius endomorphism always generate a direct summand in the endomorphism monoids of fields of prime characteristic?	335
EVEGELOS PSOMOPOULOS, On the commutativity of torsion free rings	289
G. VITHAL RAO, <i>see</i> M. L. NARAYANA RAO	
M. L. NARAYANA RAO and K. SATYANARAYANA, On a C -plane of order 25	27
M. L. NARAYANA RAO, K. SATYANARAYANA and G. VITHAL RAO, A class of translation planes of square order	59

BOGDAN RZEPECKI, An existence theorem for ordinary differential equations in Banach spaces.	449
K. SATYANARAYANA, <i>see</i> M. L. NARAYANA RAO
