

# NOTES FOR AUTHORS

## Submitting a paper

Full details on submitting a paper, including the style guide and L<sup>A</sup>T<sub>E</sub>X class file and macro package, can be found at <https://www.cambridge.org/core/journals/proceedings-of-the-royal-society-of-edinburgh-section-a-mathematics/information/instructions-contributors>

*Proceedings of the Royal Society of Edinburgh: Section A* considers for publication papers in all areas of mathematics. Please note that this journal does not consider simultaneous submissions from the same author.

- Authors will be asked to state the primary AMS 2010 Classification Number and between three and six keywords.
- Authors should nominate the most appropriate Editor for their paper.
- It is assumed that the author uploading the paper will be responsible for correspondence. A paper by more than one author should be approved in its entirety by the joint authors. An acknowledgement e-mail will be sent to all authors.
- *Proceedings A* has a page limit of 25pp but may consider papers up to five pages longer to allow for variation in final typeset length. Authors must prepare their papers as concisely as possible. Longer papers can be difficult to review in a reasonable time and can be judged more harshly.
- Each paper must be accompanied by an abstract, in general not exceeding 200 words, which will be printed.
- References should be listed at the end of the paper in alphabetical order, numbered sequentially. References within the text should be indicated by numbers in square brackets.

To submit your paper visit [https://rse.msp.org/submit\\_new.php?jpath=rse\\_proc\\_a\\_math](https://rse.msp.org/submit_new.php?jpath=rse_proc_a_math) and follow the instructions for uploading.

Once a paper has been accepted for publication, authors will be asked to supply the appropriate file. This should be a single file, with any relevant macros included in the preamble, and named after the article reference number (e.g. 150421-authorname.tex). Figures should be submitted as eps or pdf files at the same time as the code for the paper. Detailed instructions will be given on acceptance.

## Language

We recommend that non-English-speaking authors have their manuscripts checked by an English language native speaker before submission, to ensure that submissions are judged exclusively on academic merit. Third-party services specialising in language editing and/or translation can be found here: <https://www.cambridge.org/core/services/authors/language-services>. Use of any of these services is voluntary, and at the authors' own expense.

## Proofs and offprints

Authors will be sent proofs of their paper by e-mail in pdf format for checking. A pdf of the final 'publisher's version' of the paper will be sent to the corresponding author shortly after print publication in lieu of hard copy offprints.

## Copyright/Open Access

The RSE now operates a 'hybrid' Open Access model for its journals, for accepted papers submitted on or after 1 April 2013. On acceptance, authors will be given the option of having their paper published **either** under a regular publication agreement **or** under a fully Open Access agreement. Under the regular publication option, authors will be asked to sign the Journal's standard transfer of copyright form.

If authors choose the Open Access option, they will be asked to sign the alternative Open Access form and, upon payment of a one-off Article Processing Charge of UK£1780/US\$2835 (in 2017), the final published Version of Record shall be made freely available to all in perpetuity, and will be published under a creative commons licence, enabling its free re-use and re-distribution.

Please note that publication under a fully Open Access agreement is part of the Cambridge Open option. (For more details, please see: <https://www.cambridge.org/core/services/open-access-policies>)

Authors are also asked to ensure that any electronic versions of their paper clearly state the official place of publication.

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, papers published in *Proceedings A* may only be reproduced, stored or transmitted with the prior permission of the copyright holder, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. The Society permits the making of a single photocopy of an article from an issue (under Sections 29 & 38 of the Act) for an individual for the purposes of research or private study.

CONTENTS

RAMÓN J. ALIAGA, CAMILLE NOÛS, COLIN PETITJEAN AND ANTONÍN PROCHÁZKA RETRACTED - Compact reduction in Lipschitz-free spaces	1683–1699
TOMÁS CARABALLO, BOLING GUO, NGUYEN HUY TUAN AND RENHAI WANG Asymptotically autonomous robustness of random attractors for a class of weakly dissipative stochastic wave equations on unbounded domains	1700–1730
M. CHLOUVERAKI, D. GOUNDAROULIS, A. KONTOGEORGIS AND S. LAMBROPOULOU A generalized skein relation for Khovanov homology and a categorification of the $\theta$ -invariant	1731–1757
YEMON CHOI A short proof that $B(L_1)$ is not amenable	1758–1767
J. A. BARCELÓ, M. FOLCH-GABAYET, T. LUQUE, S. PÉREZ-ESTEVA AND M. C. VILELA The Fourier extension operator of distributions in Sobolev spaces of the sphere and the Helmholtz equation	1768–1789
E. I. KHUKHRO AND P. SHUMYATSKY Compact groups in which all elements have countable right Engel sinks	1790–1814
BOGDAN-VASILE MATIOC AND GEORG PROKERT Two-phase Stokes flow by capillarity in full 2D space: an approach via hydrodynamic potentials	1815–1845
HYUNJIN LEE AND YOUNG JIN SUH A new classification on parallel Ricci tensor for real hypersurfaces in the complex quadric	1846–1868
JAN BURCZAK, WOJCIECH S. OŻAŃSKI AND GREGORY SEREGIN On regularity properties of a surface growth model	1869–1892
SILVANO DELLADIO The identity $G(D)f = F$ for a linear partial differential operator $G(D)$ . Lusin type and structure results in the non-integrable case	1893–1919
RAMESH MANNA AND RAM BARAN VERMA Borderline gradient estimates at the boundary in Carnot groups	1920–1953
ZHILEI LIANG Regularity criterion on the energy conservation for the compressible Navier–Stokes equations	1954–1971
MIN LI AND ZHAOYIN XIANG The convergence rate of the fast signal diffusion limit for a Keller–Segel–Stokes system with large initial data	1972–2012
PETAR PAVEŠIĆ Topological complexity of real Grassmannians	2013–2029
NIKOLAI LEONENKO, CLAUDIO MACCI AND BARBARA PACCHIAROTTI Large deviations for a class of tempered subordinators and their inverse processes	2030–2050
BALÁZS BÁRÁNY, KÁROLY SIMON, ISTVÁN KOLOSSVÁRY AND MICHAŁ RAMS Hausdorff measure and Assouad dimension of generic self-conformal IFS on the line	2051–2081
RAMÓN J. ALIAGA, CAMILLE NOÛS, COLIN PETITJEAN AND ANTONÍN PROCHÁZKA Compact reduction in Lipschitz-free spaces - RETRACTION	2082
