THE EDITORSHIP

Members of the Association will all be very sorry to hear of the resignation of Prof. Goodstein, whose enthusiasm and ability have been so effectively at our disposal since 1956. His place as Editor has been filled by Dr. E. A. Maxwell, Queens' College, Cambridge.

It seems convenient to set out here the functions which will now be undertaken by the members of the Editorial Board. The Honorary Secretary, Mr. J. K. Backhouse, will deal with general business matters of that Board if they are addressed to him c/o The Mathematical Association, Gordon House, 29 Gordon Square, London, W.C.1.

The Assistant Editor, Dr. H. M. Cundy, The Beeches, Osborne Road, Sherborne, Dorset, is responsible for class-room notes, correspondence, gleanings, notices and articles on the teaching of mathematics, and such material should be sent direct to him. Articles, mathematical notes, reviews and all other matter for publication should (subject to the next paragraph) be sent to Dr. Maxwell at Queens' College, Cambridge.

Two Assistant Editors, Dr. J. Howlett, National Institute for Research in Nuclear Science, Atlas Computer Laboratory, Building R 1, Harwell, Didcot, Berks. and Dr. E. T. Goodwin, Superintendent, Mathematics Division, National Physical Laboratory, Teddington, Middlesex are to be particularly concerned with all aspects of applied mathematics, and material for publication should be sent to *Dr. Howlett* at Harwell. It is hoped shortly to implement the proposal for a journal for mathematicians interested in Technology foreshadowed in the first News-letter.
