## CONTENTS

	PAGE
RASTALL, R. H., and HEMINGWAY, J. E. The Yorkshire Dogger. . . . .	265
PHILLIPS, F. C. Lineation in Moinian and Lewisian Rocks of the Northern Highlands of Scotland . . . . .	279
HOLMES, A. The Age of Uraninite and Monazite from the Post-Delhi Pegmatites of Rajputana . . . . .	288
JONES, O. T. Hilt's Law and the Volatile Contents of Coal Seams . . . . .	303
LAMONT, A. New Species of Calymenidae from Scotland and Ireland . . . . .	313

### CORRESPONDENCE

Magma Types, 324 ; East Anglian Drifts, 324.

### REVIEWS

p. 325

STEPHEN AUSTIN & SONS, LTD.  
1 FORE STREET, HERTFORD, HERTS

SUBSCRIPTION 30/- PER ANNUM

# GEOLOGICAL MAGAZINE

founded in 1864

by the late Dr. H. Woodward, F.R.S., with which  
is incorporated

## THE GEOLOGIST

(founded 1858)

---

Published every two months, price 30/- per annum  
(single numbers, 6/-).

---

Subscriptions for 1949, inquiries relating to back  
stock, advertising, etc., should be sent to Stephen  
Austin & Sons, Ltd., Fore Street, Hertford, Herts.

---

### Instructions to Contributors.

Articles submitted for publication in the *Geological Magazine* should be addressed to the Editors at the *Sedgwick Museum, Cambridge*, not to the Publishers.

Manuscripts should be typewritten, double-spaced, and preferably with a wide margin, and should be carefully revised; they should be as concise as possible, and in no case should an article exceed 10,000 words. MS. must be accompanied by a short abstract, 50–100 words. References should not be given in footnotes, but arranged in alphabetic order of author's names at the end of the article; the author's name should be followed by date of publication, and the title of each paper should be given in addition to volume and page numbers of the Journal, thus:—

LAPWORTH, C. 1878. The Moffat Series. *Quart. Journ. Geol. Soc.*, xxxiv, 240–343.

References should be cited in the text by author's name and date, with page reference if necessary, in brackets:—(Lapworth, 1878, p. 339).

Illustrations should be so drawn as to allow reduction to a maximum size of  $6\frac{1}{2} \times 3\frac{1}{2}$  inches (the type-area of the Magazine) and originals must not exceed  $40 \times 22$  inches. Map lettering should be such as to be clearly legible after reduction (equivalent to 5-point as a *minimum* on reduction), while lettering on text-figures should in general be left in pencil for printing.

Authors will receive 25 reprints free of cost.

# CONTENTS OF VOLUME LXXXVI, 1949

No. 1	JANUARY—FEBRUARY	PAGE
International Geological Congress, Eighteenth Session—Great Britain, 1948 . . . . .		
		1
F. W. COPE. Crozzle and Huzzle . . . . .		36
W. Q. KENNEDY. Zones of Progressive Regional Metamorphism in the Moine Schists of the Western Highlands of Scotland . . . . .		43
JAMES M. EDMONDS. Types and figured specimens of Lower Palaeozoic Trilobites in the University Museum, Oxford . . . . .		57
J. E. HEMINGWAY. A Revised Terminology and Subdivision of the Middle Jurassic Rocks of Yorkshire . . . . .		67
CORRESPONDENCE.—Index Foraminifera of the Chalk, 71; The Term "Magma-Type", 71; On the so-called Metamorphism of the Trias in the Alps, 73; Studies in the Mona Complex—The Base of the Bedded Succession, 73.		
REVIEWS.—Eruptive Rocks, 74; The Study of Rocks, 75; Geology of the Country Around Weymouth, Swanage, Corfe, and Lulworth, 75; Symposium of Information Relative to uses of Aerial Photographs by Geologists, 76; Geological Explorations in the Island of Celebes, 76; The Geology of Ubekendt Ejland, W. Greenland, 77; Malayan Union, 78; Emanuel Kayser's Abriss der Geologie, 78; Structural Geology of Canadian Ore Deposits—A Symposium, 78; The Coast of Northeast Greenland, 80.		
ANNOUNCEMENT.—University of London: Special University Lectures in Geology, 35.		
No. 2	MARCH—APRIL	
C. E. TILLEY. An Alkali Facies of Granite at Granite-Dolomite Contacts in Skye . . . . .		81
RHONA M. MACLENNAN. A Starfish from the Glass Sand of Loch Aline . . . . .		94
K. S. SANDFORD. Notes on the Nile Valley in Berber and Dongola . . . . .		97
R. H. RASTALL. Accuracy in Geological Place-names . . . . .		110
L. M. DAVIES. <i>Ranikothalia</i> in East and West Indies . . . . .		113
M. CASIMIR and FREDERICK A. HENSON. Dyke Phenomena of the Dicq Rock, Jersey, C.I. . . . .		117
HARRELL L. STRIMPLE. Evolution of <i>Delocrinus</i> to <i>Paradelocrinus</i> , and Description of <i>Stuartwellerocrinus argentinei</i> sp. nov. . . . .		123
CORRESPONDENCE.—The Origin of Red Sandstones and Conglomerates, 128; An Occurrence of Authigenic Felspar and Quartz in Yoredale Limestones, 129; The Term "Magma-type", 130.		
REVIEWS.—Procedure in Taxonomy, 131; The Importance of Upwelling Water to Vertebrate Paleontology and Oil Geology, 131; Klockmann's Lehrbuch der Mineralogie, 131; Minerals and Mineral Deposits, 131; Sequence in Layered Rocks, 132; The Palaeogeography of the Midlands, 134; Useful Aspects of Geology, 135; Geology, 136.		
No. 3	MAY—JUNE	
E. SHERBON HILLS. Shore Platforms . . . . .		137
ISLES STRACHAN. On the Genus <i>Corynoides</i> Nicholson . . . . .		153
ALWYN WILLIAMS. New Lower Ordovician Brachiopods from the Llandeilo-Llangadock District . . . . .		161
F. G. H. BLYTH. A "Luxullianite" from East Dartmoor . . . . .		175
J. A. DOUGLAS and L. R. COX. An Early List of Strata by William Smith . . . . .		180

	PAGE
BARON FRIEDRICH VON HUENE. Classification and Phylogeny of the Tetrapods	189
CORRESPONDENCE.—East Anglian Drifts, 195 ; Indication of Geological Sites, 196.	
REVIEWS.—Physical Geology, 197 ; Geology and Scenery of the Countryside round Leeds and Bradford, 197 ; Deep Boring through Ordovician and Silurian Strata at Kinnekulle Vestergotland, 197.	
No. 4 JULY—AUGUST	
R. H. RASTALL and J. E. HEMINGWAY. The Yorkshire Dogger	201
A. WILLIAMS. New Lower Ordovician Brachiopods from the Llandeilo-Llangadock District	226
J. G. C. ARTHURSON. The Gare Loch Re-advance Moraine	239
L. KING. Pediment Landform : Some Current Problems	245
W. S. MACKENZIE. Kyanite-Gneiss within a Thermal Aureole	251
P. A. SABINE. The Source of Some Erratics from North-Eastern Northamptonshire and adjacent parts of Huntingdonshire	255
CORRESPONDENCE.—Palaeogeography of the Midlands, 260 ; Salt Tectonics and a Possible Igneous Analogy, 261 ; The Origin of Red Sandstones and Conglomerates, 261 ; Authigenic Felspar in Fuller's Earth, 262 ; Revised Nomenclature for Yorkshire Estuarine Series, 263 ; An International Secretariat for Sedimentary Petrology, 263.	
REVIEWS.—A Textbook of Geomorphology, 264 ; Introduction to Historical Geology, 264.	
No. 5 SEPTEMBER—OCTOBER	
R. H. RASTALL and J. E. HEMINGWAY. The Yorkshire Dogger	265
F. C. PHILLIPS. Linciation in Moinian and Lewisian Rocks of the Northern Highlands of Scotland	279
A. HOLMES. The Age of Uraninite and Monazite from the Post-Delhi Pegmatites of Rajputana	288
O. T. JONES. Hilt's Law and the Volatile Contents of Coal Seams	303
A. LAMONT. New Species of Calymenidae from Scotland and Ireland	313
CORRESPONDENCE.—Magma Types, 324 ; East Anglian Drifts, 324.	
REVIEWS.—Geology of the Northern Pennine Orefield, 325 ; A Study of the Structure, Classification, and Relationships of the Palaeozoic Arachnida, 326 ; The Geology of the British Empire, 327 ; Petrology of the Northampton Sand Ironstone Formation, 328 ; The Geology of Lincolnshire, 328 ; Les Graptolithes et Quelques Nouveaux Groupes d'Animaux du Tremadoc de la Pologne, 329.	
No. 6 NOVEMBER—DECEMBER	
R. CASEY. The Ammonite Genus <i>Uhligella</i> in the English Albian	333
O. T. JONES. Hilt's Law and the Volatile Contents of Coal Seams	346
W. F. WHITTARD. Geology of the Aust-Beachley District, Gloucestershire	365
J. B. SCRIVENOR. The Lizard-Start Problem	377
CORRESPONDENCE.—Photographic Prints from Cellulose-Acetate Transparencies, 387 ; Borehole Sections at Roseneath and Row, 388.	
REVIEWS.—Landscape as Developed by the Processes of Normal Erosion, 388 ; The Geology of Water Supply, 388 ; The Middle Silurian Rocks of North Wales, 389 ; Federation of Malaya: Report on the Geological Survey Department for the year 1948, 390 ; Structural History of the East Indies, 390.	
INDEX.—391.
