The Journal of Laryngology and Otology

(FOUNDED in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

G. H. BATEMAN

ASSISTANT EDITOR

LIONEL TAYLOR

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgement must be made.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced. Captions to illustrations should be typed on a separate sheet and sent at the same time as original photographs, etc.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951) *J. Laryng.*, 65, 33. Abbreviations of Journals should follow the style recommended in *World Medical Periodicals*, published by World Health Organization, 1952.

It is most important that authors should verify *personally* the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Illustration blocks are provided free up to the limit of £10 per article; beyond this authors are expected to pay half the cost. Coloured illustrations will be charged in full to authors.

Blocks will normally be held by the Printers for three years after which they will be destroyed. Any author who has borne a part of the cost of his blocks is entitled to have these returned to him, but a request for this must be sent within three years of the appearance of the article, to HEADLEY BROTHERS, 109 Kingsway, London, WC2.

5. Orders for reprints must be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Authors of original communications on Oto-Laryngology in other journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

7. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, WC2.

8. The annual subscription is four guineas sterling (U.S.A. \$13) post free, and is payable in advance.

9. Single copies will be on sale at 10s. od. each; copies of parts up to Vol. LXIII which are available may be purchased at 7s. 6d. each.

10. All subscriptions, advertising and business communications should be sent to the publishers, HEADLEY BROTHERS, 109 KINGSWAY, LONDON, WC2.

United States of America

Orders for this *Journal* may be sent through local bookseller, or to STECHERT-HAFNER, INC., 31-33 East 10th Street, New York, or direct to the publishers, HEADLEY BROTHERS, 109 KINGSWAY, LONDON, WC2, England.

‘Audi partem alteram’

St. Augustine

Fifteen hundred years ago, St. Augustine advised his readers to “hear the other side.” Today, your patients with a hearing problem will welcome the same advice from you. Just mention Ingrams.

Ingrams can help your patients to “hear the other side,” for they do not represent any one manufacturer and are thus able to give completely impartial advice about hearing aids.

Ingrams help your patient to choose from twenty-six different makes. This is the largest selection in the country—and some of the most modern aids are exclusive to Ingrams.

This is why you, like so many E.N.T. Specialists, can confidently advise your patients to hear the full story from Ingrams *before* they buy a hearing aid.

THE MODERN WAY WITH EAR WAX

Only five drops of Cerumol are needed.
In 10—30 minutes the softened or disimpacted wax
can usually be removed with a probe tipped
with cotton wool, or by gentle syringing.

The results that have been obtained in hospitals
and general practices throughout the country
confirm that Cerumol is safe and reliable and is the
modern way of dealing with ear wax. It avoids
discomfort to the patient, inconvenience to the
doctor and saves time for everyone. Indeed, in most
cases patients can easily instil the drops themselves.
The loosened wax then runs out of its own accord
and further visits to the surgery are unnecessary.

CERUMOL

REGD. TRADE MARK

Active constituents per 100 ml: p-dichlorobenzene
B.P.C. 2 G., Benzocaine B.P. 2.7 G., Chlorbutol B.P.
5 G., Ol. Terebinth 10 ml.

Pack for surgery use—dropper vial. Basic
N.H.S. cost 2/8. Hospital Pack—2 oz. bottles.

Literature will be gladly supplied on request.

'PETERS' NEW CLINIC AUDIOMETER

FOR PURE-TONE AND SPEECH

CONSIDER THESE FEATURES :

- A continuous frequency range with continuous automatic threshold compensation.
- Twin continuously variable attenuators accurate to 1 db.
- Narrow band masking of pure tones plus insert receiver.
- Manual or automatic completely silent interruption.
- Loudness Balance and Difference Limen Recruitment Tests.
- High Fidelity Speech Circuit with Accessories for Free Field Speech Audiometry.
- Full Spectrum of White Noise for Masking Speech.
- Completely Transistorised for reliability.

The Westrex Company Limited, who are leading suppliers of Deaf Education Equipment, have a nationwide servicing organisation. In the immediate future their engineers in the field will be co-operating in the speedy servicing of all "Peters" audiometers in Great Britain.

Write for a descriptive brochure giving full details of this magnificent instrument and ask for a demonstration from either :

'Diconal' Tablets for relief of intractable pain

'Diconal' Tablets provide analgesia comparable with that produced by morphine. They are therefore of great value in carcinoma. Because the tablets are given by mouth and not by injection, the patient can be kept oblivious of the fact that his condition calls for so potent an analgesic.

'Diconal' Tablets contain dipipanone and cyclizine. Dipipanone relieves severe pain; cyclizine appreciably reduces the incidence of nausea and vomiting, even in patients new to this type of therapy.

'Diconal' Tablets are:

Of high value in relief of pain due to neoplastic disease, and other conditions where narcotic drugs would be employed.

A balanced formulation which permits flexibility in dosage, according to the needs of each patient.

Often effective in morphine- and pethidine-resistant cases.

'Diconal' Tablets are subject to the D.D.A.

'Diconal' brand Tablets

Each tablet contains dipipanone hydrochloride, B.P.C. 10 mgm., and cyclizine hydrochloride, B.P.C. 30 mgm. Coloured red and scored for easy division.
