

BEA engineering

Our expanding operations ensure a busy life for BEA Engineering, which means that the meeting of our high standards offers varied and progressive careers.

We are currently looking for a **STRESSMAN** to join our Design and Development Branch at Heathrow Airport.

Stress calculations on BEA aircraft are an important facet of this branch and the man we seek will have at least HNC in Engineering (including aircraft stress analysis) with a minimum of 3 years experience in this field. A good knowledge of metallurgy and electroplating (steels and light alloys) is essential.

Possibilities in this field are high and the right man will be able to accept and meet the challenges in this important field.

Salary in the range £1945 to £2644, with excellent conditions of employment. Attractive air travel concessions are also available.

Please apply, giving full details, to:
Personnel Officer Engineering (General) (AJ)
Engineering Division
BEA Engineering Base
Heathrow Airport - London
Hounslow, Middlesex

air corporations engineering apprentice school

A Modern and Newly Equipped School at Heathrow Airport

Technical Instructors are required in the fields of:

**GENERAL ENGINEERING
ENGINE/AIRFRAME
ELECTRICAL/INSTRUMENTS**

to provide training for boys in the first two years of a four-year apprenticeship.

Applicants must have served a recognised Engineering or Aeronautical Engineering Apprenticeship followed by five years practical experience. While a teaching qualification such as City & Guilds Teaching Certificate would be advantageous, the lack of such qualifications should not deter candidates with a marked ability in verbal and written expression plus a positive interest in training and training technology.

The salary commences within the range of £1758-£2045 for a Technical Instructor, but successful applicants are expected to qualify within a reasonable period of time for promotion to Technical Training Officer (Cat. B), salary £1945-£2644. Subsequently, a very real opportunity will exist for promotion to Technical Training Officer (Cat. A), salary £2423-£2898.

Conditions of employment are first class and there are attractive air travel concessions.

Please apply, giving full details, to:
Personnel Officer Engineering (General) (AJ)
Engineering Division
BEA Engineering Base
Heathrow Airport - London
Hounslow, Middlesex.

UNIVERSITY OF SOUTHAMPTON

Department of Aeronautics and Astronautics Spitfire Mitchell Memorial Studentship

Applications are invited from holders of good honours degrees in Engineering or Science or Mathematics for research work in a branch of Aeronautics and Astronautics. Main research areas, Aero and Gas Dynamics, Propulsion, Avionics, Structural Dynamics and Rotorcraft.

The value of the studentship, which is for two years and may be extended for a third year, will be not less than £600. Closing date 7th August 1970.

For further details and application write to:
Academic Registrar, The University, Highfield, Southampton,
SO9 5NH, quoting ref: JRAS.

CARPETS

for aircraft, passenger reception, airline offices, flying clubs, etc.

All leading makes of Branded Carpets

WILTONS • AXMINSTERS • TUFTED • ORIENTALS
at Highly Competitive contract prices

Expert fitting service and free delivery throughout UK.

THE AERONAUTICAL JOURNAL OF THE ROYAL AERONAUTICAL SOCIETY)			

[ADVERTISEMENTS JULY 1970

advancing into the 70's

These are the advanced helicopters that the British and French Governments have decided will equip the Armed Forces of their countries, in substantial numbers, in the next decade.

WG.13 British Army

WG.13 French Navy

WG.13 R.A.F.

WG.13 Royal Navy

SA.341 French Army

SA.341 British Army

SA.330 French Army

SA.330 R.A.F.

The British and French Governments have made the decision to launch production of the Sud Aviation SA.341 light general-purpose helicopter and to go ahead with the full development programme of the Westland WG.13 multi-Service, twin-engined helicopter.

This continuing Government support:—

- * Underlines the confidence of both Governments in the joint helicopter programme of Westland Helicopters and Sud Aviation.
- * Fully establishes the range of new helicopters for the British and French Armed Forces.
- * Reflects Government satisfaction with the development progress of WG.13, with the solution of SA.341 technical problems and with the capability of the aircraft to meet British and French requirements.
- * Highlights the strong, well-founded European capability to provide advanced helicopters that will be competitive in cost, delivery and performance.
- * Sets the stage for an intensive export sales drive by Westland and Sud.
