JFM ARCHIVE

Journal of
Fluid Mechanics
Digital Archive
1956–1996

*Vital research from
the definitive source*

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

European Journal of Applied Mathematics

Co-Editors-in-Chief

S. D. Howison, *University of Oxford, UK*

A. A. Lacey, *DPMMS, Heriot-Watt University, UK*

M. J. Ward, *University of British Columbia, Canada*

Since 2008 *EJAM* surveys have been expanded to cover Applied and Industrial Mathematics. Coverage of the journal has been strengthened in probabilistic applications, while still focusing on those areas of applied mathematics inspired by real-world applications, and at the same time fostering the development of theoretical methods with a broad range of applicability. Survey papers contain reviews of emerging areas of mathematics, either in core areas or with relevance to users in industry and other disciplines. Research papers may be in any area of applied mathematics, with special emphasis on new mathematical ideas, relevant to modelling and analysis in modern science and technology, and the development of interesting mathematical methods of wide applicability.

CAMBRIDGE
UNIVERSITY PRESS

Journal of Mechanics

Published on behalf of The Society of Theoretical and Applied Mechanics, R.O.C.

Editor-in-Chief

K. C. Wu, National Taiwan University, Taiwan

The objective of the *Journal of Mechanics* is to provide an international forum to foster exchange of ideas among mechanics communities in different parts of world. The Journal publishes original research in all fields of theoretical and applied mechanics.

The *Journal of Mechanics* especially welcomes papers that are related to recent technological advances, such as micro/nanomechanics, medical and biological systems, and microscale heat transfer. The contributions, which may be analytical, experimental or numerical, should be of significance to the progress of mechanics. Papers which are merely illustrations of established principles and procedures will generally not be accepted. Reports that are of technical interest are published as Short articles. Review articles are published only by invitation.

CAMBRIDGE
UNIVERSITY PRESS

Journal of Plasma Physics

Editors

Bill Dorland, University of Maryland Honors College, USA
Alex Schekochihin, University of Oxford, UK

With two new Editors and seven new Associate Editors joining the editorial team *Journal of Plasma Physics* aspires to be the intellectual home of those who think of plasma physics as a fundamental discipline. The journal will particularly focus on publishing research on laboratory plasmas, space physics and plasma astrophysics that takes advantage of the rapid ongoing progress in instrumentation and computing to advance fundamental understanding of multiscale plasma dynamics.

JFM Rapids (online only)

R1 Capillary bridges between a plane and a cylindrical wall
E. Reyssat

R2 On the concentration of near-inertial waves in anticyclones
E. Danioux, J. Vanneste & O. Bühler

R3 Thin-sheet flow between coalescing bubbles
J. P. Munro, C. R. Anthony, O. A. Basaran & J. R. Lister

S R4 On the mechanism of turbulent drag reduction with super-hydrophobic surfaces
A. Rastegari & R. Akhavan

S indicates supplementary data or movies available online.

- 1 The Taylor–Melcher leaky dielectric model as a macroscale electrokinetic description
O. Schnitzer & E. Yariv
- 34 On the derivation of the HOMFLYPT polynomial invariant for fluid knots
X. Liu & R. L. Ricca
- 49 Modelling turbulence generation in solitary waves on shear shallow water flows
G. L. Richard & S. L. Gavriluk
- 75 A thin drop sliding down an inclined plate
E. S. Benilov & M. S. Benilov
- 103 Turbulence attenuation in particle-laden flow in smooth and rough channels
A. W. Vreman
- 137 On the reflection and transmission of circumferential waves through nozzles
I. Duran & A. S. Morgans
- 154 Exact two-dimensionalization of low-magnetic-Reynolds-number flows subject to a strong magnetic field
B. Gallet & C. R. Doering
- S 178 Turbulent diapycnal mixing in stratified shear flows: the influence of Prandtl number on mixing efficiency and transition at high Reynolds number
H. Salehipour, W. R. Peltier & A. Mashayek
- 224 Scaling of detonation velocity in cylinder and slab geometries for ideal, insensitive and non-ideal explosives
S. I. Jackson & M. Short
- 267 Buoyancy-induced turbulent mixing in a narrow tilted tank
T. Y. Lin, C. P. Caulfield & A. W. Woods
- 298 Systematic errors of skin-friction measurements by oil-film interferometry
A. Segalini, J.-D. Rüedi & P. A. Monkewitz
- 327 Large eddy simulations of stratified turbulence: the dynamic Smagorinsky model
S. Khani & M. L. Waite
- 345 A general self-preservation analysis for decaying homogeneous isotropic turbulence
L. Djenidi & R. A. Antonia
- S 366 On the interaction of a planar shock with an SF₆ polygon
X. Luo, M. Wang, T. Si & Z. Zhai
- 395 Kinetic energy transport in Rayleigh–Bénard convection
K. Petschel, S. Stellmach, M. Wilczek, J. Lülff & U. Hansen
- 418 A fast direct numerical simulation method for characterising hydraulic roughness
D. Chung, L. Chan, M. MacDonald, N. Hutchins & A. Ooi
- 432 Parameters influencing vortex growth and detachment on unsteady aerodynamic profiles
A. Widmann & C. Tropea
- 460 Interaction of a vortex ring with a single bubble: bubble and vorticity dynamics
N. K. Jha & R. N. Govardhan
- S 498 Tracer trajectories and displacement due to a micro-swimmer near a surface
A. J. T. M. Mathijssen, D. O. Pushkin & J. M. Yeomans
- 520 Exact regularized point particle method for multiphase flows in the two-way coupling regime
P. Gualtieri, F. Picano, G. Sardina & C. M. Casciola
