Sorice (Rome, Italy), G. Toniatti (Rome, Italy), J. L. Touraine (Lyon, France), N. Trainin (Rehovot, Israel), A. Tursi (Bari, Italy), A. Ugazio (Pavia, Italy), G. Vicari (Rome, Italy), A. Vierucci (Florence, Italy), T.A. Waldmann (Bethesda, USA), H. Wigzell (Stockholm, Sweden)

"Immunologia Clinica" has reached its ninth year of quarterly publication and is now seeking a more substantial presence on the scene of scientific journals. An effort is now due to make the journal a fruitful tool of communication and discussion for the national immunologists' community and to create a product of interest also outside the Italian boundaries. The ultimate goal will be the acquisition of a relevant position in the international scientific literature, European in particular, without competing with the existing, and somewhat redundant, publications in the field. "Immunologia Clinica" focuses its interest on every link between immunity and pathology; contributions to the journal deal with disorders of the immune system, immunity to infectious agents and immunopathogenesis of diseases, both in humans and in experimental models. A particular attention is given to reports of controlled clinical trials in which new immunotherapeutic agents are employed. As part of the progressive renewal and growth of the journal, manuscripts must be submitted in English and review and opinion articles are strongly encouraged.

Quarterly

Instructions to authors may be requested and manuscripts should be submitted to the Editor:

PARASITISM AND HOST BEHAVIOUR

Edited by **C J Barnard** and **J M Behnke**

Bringing together recent work across the disciplines of Parasitology and Animal Behaviour, this book reveals the fundamental role of parasitism in the evolution of behaviour.

0-85066-498-5 343pp August 1990 Cloth £45.00

PARASITIC NEMATODES: Antigens, Membranes and Genes

Edited by **Malcolm W Kennedy**

This book reviews recent studies on immunological mechanisms and host/parasite membrane relationships, working towards better pharmacological control. It will be a valuable source to postgraduate students researching related areas.

0-85066-772-0 c250pp
Publication May 1991
Cloth c£30.00

A GUIDE TO HUMAN HELMINTHS

Isabel Coombs and
David W T Crompton

A definitive classification list for all the species of helminths known to be associated with humans. It establishes the valid names for species of human helminth and gives additional useful information on hosts, distribution and other features, in a clear concise and easily retrievable form.

0-85066-807-7 Paper c£15.00
c120pp Publication April 1991
