COMORBIDITET SOCIAL PHOBIA AND ALCOHOLISM

T. Kozarov¹, B. Ivic²

¹Department of Alcoholism, ²Spec. Psych. Hospital G. Toponica Nish, Nish, Serbia

Alcoholism is the modern disease on the third place in modern society after cardiac and malignant disease. Social phobia is generally spread phobia (20-40%) people had some kind of fear and anxiety in most causal social activity. Examination has prepared on alcololic department SBB - G. Toponica. They have 44 beds, 38 males beds. From 38 males beds, we found 6 patients with social phobia (15,08%).

Methods and results: It has been used WILLOU GHBY PERSONALITY SCHEDULE -all of them have been over fifty points which means that all of them have social phobia. They are curred with REMERON and TRITTICO and cognitiv behavior psycho therapy. REMERON has great success in secondary depression reduction. TRITTICO has great succes in anxiety reduction.
