

# Geoforum

## EDITORIAL BOARD

Managing Editor: JUDITH A. REES (London)  
Executive Editors: DEREK DIAMOND (London)  
DAVID K. C. JONES (London)

Oxford · New York · Paris · Frankfurt

*Geoforum* is an international, multi-disciplinary journal, global in outlook, integrative in approach and policy oriented. Its primary concern is with all aspects of the management of the human environment; an area of study broadly defined to encompass urban and regional planning, industrial development, resource allocation and the management of physical environmental systems. The journal provides a forum for rapid publication of original research papers, reports and reviews.

The editors particularly wish to encourage:  
\* Publication of the results of applied research

\* Publication of results of research of an international character  
\* Publication of interdisciplinary research, particularly that which promotes better understanding of the complex interrelationships that exist within and between the physical and socio-economic systems, and which helps forge links between the natural and social sciences.

Relevant papers are welcomed for editorial consideration.

Members of The Baltic Mercantile & Shipping Exchange.

## The Island of South Georgia

R. K. HEADLAND

This book describes the history, geography, geology, biology, economy and government of the island of South Georgia. It will be of great interest to those who followed the Falklands dispute, as Mr. Headland was the principal civilian administrator at that time, and the book incorporates a first hand account of the crisis. The text is illustrated with one hundred and forty pictures and photographs. **£14.95 net**

*(Forthcoming October)*

## The Living Tundra

Y. I. CHERNOV

Translated by DORIS LÖVE

This wide-ranging account of the life of the tundra provides a fascinating insight into the ways in which animals, plants and climate interact in the inhospitable environment of the Soviet Northlands. The author quotes extensively from the work of Russian scientists, and so the book contains invaluable information for the non-Russian speaking arctic biologists. **About £25.00 net**
