<b>A generalization of Radon's theorem II</b>	321
by H. Tverberg .. .. .	
<b>On the absolute summability factor of Fourier series</b>	327
by Yasuo Okuyama .. .. .	
<b>Finite Prandtl number convection with nearly insulating boundaries</b>	339
by N. Riahi .. .. .	
<b>Necessary and sufficient conditions for spectral sets</b>	349
by Takayuki Furuta and Muneo Chō .. .. .	
<b>Invex functions and constrained local minima</b>	357
by B. D. Craven .. .. .	
<b>On equicontinuous transformation groups</b>	367
by Saber Elaydi .. .. .	
<b>Embedding group amalgams</b>	373
by Patrick Fitzpatrick and James Wiegold .. .. .	
<b>A radius of convexity problem</b>	381
by M. L. Mogra and O. P. Juneja .. .. .	
<b>Representation of Boolean hypolattices</b>	389
by John Boris Miller .. .. .	
<b>Manufacturing sequences for the Economic Lot Scheduling problem</b>	405
by James M. Fitz-Gerald and Elizabeth J. Billington .. .. .	
<b>Iteration of piecewise linear maps on an interval</b>	433
by James B. McGuire and Colin J. Thompson .. .. .	
<b>Stability criteria for contractive semigroups via maximality procedures</b>	453
by Mihai Turinici .. .. .	

### ABSTRACTS OF AUSTRALASIAN PhD THESES

<b>Spacetime killing tensors in general relativity</b>	471
by Edwin Hans van Leeuwen .. .. .	
<b>Direct products of monogenic semigroups</b>	475
by D. C. Trueman .. .. .

## INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after being evaluated by the Editor and an Associate Editor or another expert. Of course responsibility for the correctness of results published in the BULLETIN remains with the authors.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to  
The Editor, Bulletin of the Australian Mathematical Society,  
Department of Pure Mathematics, La Trobe University,  
Bundoora, Victoria 3083, Australia

but should not send the original typescript of their papers, as material submitted to the BULLETIN will usually not be returned. Authors should note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification.

As even minor revisions are generally not permitted, authors should read carefully all the details listed on the inside back cover.

## Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 3 months of the degree being approved.
