## **The Thought of Gregory the Great**

**G. R. EVANS**

Gregory the Great was, after Augustine of Hippo, perhaps the most influential of the Fathers in the Latin West during the Middle Ages. This study looks at Gregory's thought as a whole and tries to show what was most important to him and the way he arrived at a balance between the active and the contemplative, the 'outward' and the 'inward' in his own mind. There is a tailpiece on the influence of his ideas in later centuries.

## Godly Learning

Puritan Attitudes towards Reason, Learning, and Education  
1560-1640

JOHN MORGAN

A full-scale re-interpretation of the intellectual attitudes which lay behind the English Puritans' better-known political and ecclesiastical viewpoints, this book also examines the Puritan network of parents, schoolmasters, college tutors, ministers, and patrons. Great emphasis is given to the education of Puritan ministers, depicted as God's vanguard for reform.

'... thoroughly researched, thoughtfully argued, generally a treat to read.'

## The Victorian Christian Socialists

EDWARD NORMAN

Victorian Christian Socialism began as a protest against industrial evils by a group of Anglicans and soon their ideals began to spread to other Churches, although not as a systematic 'movement'. Dr Norman here offers a history of Christian Socialism constructed around the most influential of its advocates. They are shown to have been ethical and educational reformers rather than politicians, but in their ability to stand outside the common assumptions and prejudices of their day they achieved social criticism of lasting value.

## Democracy and Religion

Gladstone and the Liberal Party, 1867-1875

J. P. PARRY

This book offers a radically new synthesis of political, intellectual and ecclesiastical history, and challenges the view that nineteenth-century politics can be properly understood if treated in primarily secular terms.

'...a *sine qua non* for the history of the later Victorian age.'

“This wide-ranging book is an extraordinarily significant contribution to the study of the late antique and early mediaeval Mediterranean world. The author is in complete control of current scholarship, but she brings a comparative vision to this material that is uniquely her own. For a work of such breadth and boldness, the balance that reigns throughout is quite astonishing.”

## THE FORMATION OF CHRISTENDOM

*Judith Herrin*

In a lucid history of what used to be termed “the Dark Ages,” Judith Herrin outlines the origins of Europe from the end of late antiquity to the coronation of Charlemagne. She shows that the clash between nascent Islam and stubborn Byzantium was the central contest that allowed “Europe” to develop, and she thereby places the rise of the West in its true Mediterranean context. Her inquiry centers on the notion of “Christendom.”
