

## Corrigendum

Moncada, B., Lüicking, R. & Betancourt-Macuase, L. (2013) Phylogeny of the Lobariaceae (lichenized Ascomycota: Peltigerales), with a reappraisal of the genus *Lobariella*. *Lichenologist* 45(2): 203–263.

The authors accidentally submitted the wrong Fig. 2 on p. 215. The correct figure, as published here, has the following changes: the name *Pseudocyphellaria* s.str. replaced by *Crocodia*, and the name *Stictina* replaced by *Pseudocyphellaria*.

Fig. 2 (corrected). Alternative clade topologies found in the individual mtSSU, nuLSU, and ITS gene trees. Thick lines indicate clades with bootstrap support of 70% or higher. In colour online.
